Conflict in Asia Uk Heo, Shale A. Horowitz, 2003-04-30 Much of the world reaped a peace dividend with the end of the Cold War yet Asia has seen little reduction in tensions and military spending Three Cold War era conflicts those dividing China and Taiwan North and South Korea and India and Pakistan remain unresolved Other regional powers as well as the United States continue to be concerned about these volatile disputes North Korea s nuclear and long range missile development China s opposition to Taiwan s pursuit of independence and Pakistan s longstanding dispute with India have all received increasing media attention This is the first volume using a common approach to examine post Cold War changes in these three volatile dyads The book s case studies detail the evolution of each country s security policy and its shifting mix of alliances The authors analyze U S interests and discuss how U S intervention affects strategic calculations of the conflicted states This mechanism allows gives the readers a truer understanding of the conflicts and how they interact within the Asian security system in general Each of the dominant theoretical frameworks of international relations neo realism neo liberalism and constructivism offer crucial insights into this complicated situation

Project on Nuclear Issues Mark Cancian, 2017-05-09 The role that nuclear weapons play in international security has changed since the end of the Cold War but the need to maintain and replenish the human infrastructure for supporting nuclear capabilities and dealing with the multitude of nuclear challenges remains essential Recognizing this challenge CSIS launched the Project on Nuclear Issues PONI in 2003 to develop the next generation of policy technical and operational nuclear professionals through outreach mentorship research and debate PONI runs two signature programs the Nuclear Scholars Initiative and the Annual Conference Series to engage emerging nuclear experts in thoughtful and informed debate and research over how best to address the nuclear community's most pressing problems The papers included in this volume comprise research from participants in the 2016 Nuclear Scholars Initiative and the PONI Conference Series PONI sponsors this research to provide a forum for facilitating new and innovative thinking and to provide a platform for emerging thought leaders across the nuclear enterprise Spanning a wide range of technical and policy issues these selected papers further serious discussion in their respective areas

Getting to Nuclear Zero in Northeast Asia Gregory Kulacki, Keiko Nakamura, Jae-Jung Suh, Tatsujiro Suzuki, 2025-06-27 This book presents realistic alternatives to security policies based on nuclear weapons for the Northeast Asian region Northeast Asian governments and populations feel less secure than ever and the governments of the USA Russia China and North Korea are all expending considerable resources on increasing their nuclear arsenals This book presents realistic alternatives to security policies dependent on threats to use nuclear weapons and demonstrations of the resolve to use them in a war Those alternatives are grounded in the well established concept of common security The long term goal of these alternatives is the establishment of a nuclear weapon free zone in Northeast Asia This book demonstrates that lessons learned during the creation of existing nuclear weapon free zones can be successfully adapted using the proposed alternatives to nuclear threats to the considerably more challenging circumstances that exist in contemporary Northeast Asia More importantly it makes the case that the mere process of pursuing this objective even if the goal is not realized for many decades would help facilitate regional risk reduction measures and global nuclear arms control measures that could lead in the long term to the general and complete disarmament promised by the Nuclear Nonproliferation Treaty NPT and the Treaty on the Prohibition of Nuclear Weapons TPNW of 2021 This book will be

of interest to students of nuclear proliferation Asian security foreign policy and International Relations *The China Challenge* Thomas J. Christensen, 2015-06-02 A standout a balanced informative and highly intelligent guide to dealing with China Fareed Zakaria Many see China as a rival superpower to the United States and imagine the country's rise to be a threat to U S leadership in Asia and beyond Thomas J Christensen argues against this zero sum vision Instead he describes a new paradigm in which the real challenge lies in dissuading China from regional aggression while encouraging the country to contribute to the global order Drawing on decades of scholarship and experience as a senior diplomat Christensen offers a compelling new assessment of U S China relations that is essential reading for anyone interested in the future of the globalized world The China Challenge shows why China is nowhere near powerful enough to be considered a global peer competitor of the United States but it is already strong enough to destabilize East Asia and to influence economic and political affairs worldwide Despite China's impressive achievements the Chinese Communist Party faces enormous challenges Christensen shows how nationalism and the threat of domestic instability influence the party's decisions on issues like maritime sovereignty disputes global financial management control of the Internet climate change and policies toward Taiwan and Hong Kong China benefits enormously from the current global order and has no intention of overthrowing it but that is not enough China's active cooperation is essential to global governance Never before has a developing country like China been asked to contribute so much to ensure international stability If China obstructs international efforts to confront nuclear proliferation civil conflicts financial instability and climate change those efforts will falter but even if China merely declines to support such efforts the problems will grow vastly more complicated Analyzing U S China policy since the end of the Cold War Christensen articulates a balanced strategic approach that explains why we should aim not to block China's rise but rather to help shape its choices so as to deter regional aggression and encourage China's active participation in international initiatives that benefit both nations 1967 Annual Supplement John B. Simeone, Alfred de Grazia, Carl E. Martinson, 2013-12-01
