Neurobehavioural Disability and Social Handicap Following Traumatic Brain Injury is essential reading for clinical psychologists psychiatrists and neurologists working in brain injury rehabilitation The book will also be of interest to relatives of those with brain injury seeking better knowledge to understand neurobehavioural disability as well as the growing number of therapy care assistants case managers support workers and social workers responsible for the day to day care of brain injured people in the community

Managing Challenging Behaviour Following Acquired Brain Injury Nick Alderman, Andrew Worthington, 2023-11-24 This empirically based book provides conceptual knowledge and practical advice to enable clinicians to implement evidence based methods drawn from learning theory for managing the catastrophic effects of challenging behaviour as an enduring outcome of acquired brain injury ABI Based on a conceptual framework of neurobehavioural disability the book takes a holistic case formulation approach incorporating functional assessment procedures arising from the operant learning tradition that underpins the design of treatment interventions It bridges the knowledge gap in uniquely providing a single resource to enable practitioners to implement evidence based methods to better manage ABI behaviour disorders The authors who are leading experts in the field have described a model of intervention based on a functional analytic approach to understanding

behaviour within an operant learning framework The chapters provide a step by step approach to assessment formulation intervention and evaluation of behaviour support plans and feature examples for specific challenging behaviours in a variety of different contexts The book is organised to support the use of this model through expert contributions concerning the origins of challenging behaviour assessment methods and formulation and interventions The practical orientation of this book makes it an indispensable read for neuropsychologists clinical psychologists and other rehabilitation specialists involved in the care of people with ABI as well as researchers in these fields
