Perspectives On Garden Histories

Sarah Dewis, Brent Elliott

Perspectives On Garden Histories:

Perspectives on Garden Histories Michel Conan, 1999 Garden history is a discipline of contested purposes Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline **Baroque Garden Cultures** Michel Conan, 2005 Baroque Garden Cultures proposes a new approach to the study of baroque gardens examining the social reception of gardens as a means to understand garden culture in general and exploring baroque gardens as a feature of baroque cultures in particular **Middle East Garden Traditions** Michel Conan, Dumbarton Oaks, 2007 This book unites new information and surprising results from the last fifteen years of garden research at a remove from the clichés of Orientalism Garden archaeology reveals the economic importance of Judean gardens in Roman times and the visual complexity of gardens created and transformed in Moorish Spain More contemporary approaches unravel the cultural continuities variations and differences between gardens in the Middle East since Roman times and in the Islamic world **Garden History** John Dixon Hunt, 1992 This collection of essays explores the issues methods and approaches that students in landscape architecture have developed during that period to cope with the expanding subject of gardens and their history The volume will serve as a bench mark in the field with its range of approaches and wealth of illustrative material Each contributor focuses upon a specific piece of his or her research and uses this as a basis to discuss the wider implications of the study of gardens within such contexts as botanical horticultural agrarian literary technological social culture political and art history Provided by publisher **Garden History** Gordon Campbell, 2019-02-15 Gardens take many forms and have a variety of functions They can serve as spaces of peace and tranquility a way to cultivate wildlife or as places

to develop agricultural resources Globally gardens have inspired comforted and sustained people from all walks of life and since the Garden of Eden many iconic gardens have inspired great artists poets musicians and writers In this Very Short Introduction Gordon Campbell embraces gardens in all their splendour from parks and fruit and vegetable gardens to ornamental gardens and takes the reader on a globe trotting historical journey through iconic and cultural signposts of gardens from different regions and traditions Ranging from the gardens of ancient Persia to modern day allotments he concludes by looking to the future of the garden in the age of global warming and the adaptive spirit of human innovation ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Nineteenth-Century Gardens and Gardening Sarah Dewis, Brent Elliott, 2024-06-19 This volume is number one of a six volume collection that brings together primary sources on gardens and gardening across the long nineteenth century Economic expansion empire the growth of the middle classes and suburbia the changing role of women and the professionalisation of gardening alongside industrialisation and the development of leisure and mass markets were all elements that contributed to and were influenced by the evolution of gardens It is a subject that is both global and multidisciplinary and this set provides the reader with a variety of ways in which to read gardens through recognition of how they were conceived and experienced as they developed Material is primarily derived from Britain with Europe USA Australia India China and Japan also featuring and sources include the gardening press the broader press government papers book excerpts and some previously unpublished material **Patrons and Adversaries** Caroline Castiglione, 2005-02-03 The early modern Roman countryside was a site of contestation between great aristocratic families and an expanding papal political regime Rarely has the role of the inhabitants of this landscape the villagers been considered as part of that power struggle As Caroline Castiglione shows in this compelling revisionist work one Roman aristocratic family the Barberini was not squeezed out of governing by the extension of the papal bureaucracy but rather became increasingly engaged with it during the long eighteenth century Through their participation in the rural commune villagers in an extensive territory belonging to the Barberini became active participants in the governing of the countryside Villagers cultivated and exploited interference from the aristocratic family and the papal government but they also kept urban elites at bay defending their rights through the strategies of adversarial literacy Such literate practices drew on village mastery of local constitutions debates in the village assembly and brilliant use of the legal system of the papacy to thwart the designs of the Barberini Later villagers created and interpreted sources for themselves effectively challenging the elite monopoly on making and interpreting texts A lost world of increasingly savvy villagers irate nobles and exasperated bureaucrats emerges here in an engaging narrative that chronicles how seemingly marginalized villagers challenged the pragmatic control of the Roman countryside using texts and ideas that

urban elites had exported to the countryside for other purposes

Public Garden Management: a Global Perspective BIJAN DEHGAN, 2014-04-15

Public Gardens Management A Global Perspective provides essential information about public gardens and what is involved in designing managing and maintaining one Although suitable as a textbook its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen It may also prove useful for homeowners for there is no fundamental difference between growing plants in a public garden or a home garden a fact reflected in the extensive reference citations The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he she was in a natural but well ordered garden environment Thus began the art of garden making Many volumes have been written on every applicable subject discussed in this and similar publications Indeed the voluminous literature on history design horticulture and numerous related subjects is nothing short of overwhelming Accordingly anyone involved in management of public gardens whether as a director or area supervisor and irrespective of the type and size of such facility would have to have familiarity with various aspects of garden organization and administration However despite the enormous number and diversity of such publications there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book These volumes provide the essential background information on plants animals management maintenance fundraising and finances as well as history art design education and conservation They also cover a host of interrelated subjects and responsible organization of such activities as creating a childrens garden horticultural therapy conservatories zoological gardens and parks hence administration of multidimensional public gardens Nearly 500 full color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management The 15 chapters begin with the need for public gardens types of public gardens historical backgrounds as well as design diversity Numerous quotations are included from many garden lovers landscape architects philosophers and others The authors primary aim in writing this book was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all animals need plants for their survival Visitors of zoological gardens expect to see more than just animals zoos are landscaped grounds Moreover most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks A number of public gardens are currently referred to as botanical and zoological garden Population density and the publics desires and expectations as well as financial requirements

are among the reasons for some major city parks such as Golden Gate in San Francisco Central Park in New York City and Lincoln Park in Chicago which integrate botanical or zoological divisions as well as museums and recreational facilities While this book attempts to provide basic principles involved in public garden management it does not claim to be a substitute for broader familiarity

Performance and Appropriation Michel Conan, 2007 Breaking with the idea that gardens are places of indulgence and escapism these studies of ritualized practices reveal that gardens in Europe Asia the United States and the Caribbean have in fact made significant contributions to cultural change This book demonstrates methods and the striking results of garden reception studies The first section explores how cultural changes occur and devotes chapters to public landscapes in the Netherlands seventeenth century Parisian gardens Freemason gardens in Tuscany nineteenth century Scottish kitchen gardens and the public parks of Edo and modern Tokyo The second part provides striking examples of construction of self in vernacular gardens in Guadeloupe and American Japanese style gardens in California Finally the third section analyzes struggles for political change in gardens of Yuan China and modern Britain

Garden History Tom Turner, 2005-09-01 An updated version of this book is now available as European Gardens 2011 also by Tom Turner Expanding into other regions are Asian Gardens 2010 and the forthcoming British Gardens both also by Turner and published by Routledge Tom Turner well known teacher and writer in landscape architecture garden design and garden history here explores more than 150 gardens over four millennia of Western garden design He considers the why the what the how and the where of garden design by tracing the development of gardens through history and across social political and philosophical boundaries Fully illustrated throughout each chapter critically examines a particular type of garden both as part of a wider socio political context and as an aesthetic entity asking how the design of each garden reflects the philosophical approach of its creator Inspirational reflective and informative this book brings together knowledge and understanding from a diverse range of related interests to add depth and breadth to a fascinating subject
