The first introductory palaeontology text which demonstrates the importance of selected fossil groups in geological and biological studies particularly in understanding evolutionary patterns palaeoenvironmental analysis and stratigraphy Part one explores several key concepts such as the processes of fossil preservation the determination of evolutionary patterns and use of fossils and stratigraphical tools Part two introduces the main fossil groups of value in these applied fields Part three concentrates on the examination of important case histories which demonstrate the use of fossils in diverse practical examples Evolutionary studies palaeoenvironmental analysis and stratigraphical applications are documented using up to date examples supported by overviews of the principles **Hidden Histories of Science** Robert B. Silvers, 1995 We often think of science as continuously advancing In this collection of essays five world renowned writers explore obscure and neglected episodes in the history of science which suggest instead that the process of understanding the significance of scientific discoveries can be erratic contradictory even irrational Jonathan Miller Oliver Sacks and Daniel Kevles show how promising new ideas may at first fail to be noticed or accepted and then years after they have been dismissed or forgotten are recognized in a different form as important R C Lewontin and Stephen Jay Gould discuss the ways that words and images used by scientists and popularizers alike from the murals on the walls of natural history museums to such ubiquitous terms as adaptation and environment reflect serious and often unacknowledged distortions in the way we conceive of both individual organisms and the natural history of the world These essays demonstrate that science is in the words of Oliver Sacks a human enterprise through and through an organic evolving human growth with sudden spurts and arrests and strange deviations too It grows out of its past but never outgrows it any more than we outgrow our childhood *The Journal of Education* ,1893 **Children of tempest.
