Privitizing Nature Political Struggles:

Privatizing Nature Michael Goldman, 1998 An easily read book illuminating the multifarious process of environmental degradation as well as the motley social movements especially on a grass root level resisting the privatisation of common resources and ecological degradation on both a local and global level Capital Class Tackling the key themes such as the convergence of environment and social justice global commodities and the role of social movements the contributors draw on examples from the Amazon Mexico Cameroon India and the industrialised North A Companion to Environmental

Geography Noel Castree, David Demeritt, Diana Liverman, Bruce Rhoads, 2016-10-03 A Companion to Environmental Geography is the first book to comprehensively and systematically map the research frontier of human environment geography in an accessible and comprehensive way Cross cuts several areas of a discipline which has traditionally been seen as divided presenting work by human and physical geographers in the same volume Presents both the current state of the art research and charts future possibilities for the discipline Extends the term environmental geography beyond its traditional meanings to include new work on nature and environment by human and physical geographers not just hazards resources and conservation geographers Contains essays from an outstanding group of international contributors from among established scholars and rising stars in geography **The Oxford Handbook of Environmental Political Theory** Teena

Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07 Set at the intersection of political theory and environmental politics yet with broad engagement across the environmental social sciences and humanities The Oxford Handbook of Environmental Political Theory defines illustrates and challenges the field of environmental political theory EPT Featuring contributions from distinguished political scientists working in this field this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches The initial volume focuses on EPT as a field of inquiry engaging both traditions of political thought and the academy In the second section the handbook explores conceptualizations of nature and the environment as well as the nature of political subjects communities and boundaries within our environments A third section addresses the values that motivate environmental theorists including justice responsibility rights limits and flourishing and the potential conflicts that can emerge within between and against these ideals The final section examines the primary structures that constrain or enable the achievement of environmental ends as well as theorizations of environmental movements citizenship and the potential for on going environmental action and change

Nature for Sale Giovanna Ricoveri, 2013-06-20 Uncovering the rich heritage of common ownership which existed before the dominance of capitalist property relations Giovanna Ricoveri argues that the subsistence commons of the past can be reinvented today to provide an alternative to the current destructive economic order Ricoveri outlines the distinct features of common ownership as it has existed in history through cooperatives sustainable use of natural resources and direct democracy In doing so she shows how it is possible to provide goods and services which are not commodities exchanged on

the capitalistic market something still demonstrated today in village communities across the global South Tracing the erosion of the commons from the European enclosures at the dawn of the Industrial Revolution to the new enclosures of modern capitalism the book concludes by arguing that a new commons is needed today It will be essential reading for activists as well as students and academics in history politics economics and development studies The Gloss of Harmony Birgit Müller,2013-10-09 The Gloss of Harmony focuses on agencies of the United Nations examining the paradox of entrusting relatively powerless and underfunded organisations with the responsibility of tackling some of the essential problems of our time The book shows how international organisations shape the world in often unexpected and unpredictable ways The authors of this collection look not only at the official objectives and unintended consequences of international governance but also at how international organisations involve collective and individual actors in policy making absorb critique attempt to neutralise political conflict and create new political fields with local actors and national governments The Gloss of Harmony identifies the micro social processes and complexities within multilateral organisations which have up to now been largely invisible This book will have wide appeal not only to students and academics in anthropology business studies and sociology but also to all practitioners concerned with international governance *Race, Nature, and the Politics of Difference* Donald S. Moore,Jake Kosek,Anand Pandian,2003-05-20 A collection of essays that show the interdependence of concepts of race and nature *The Routledge Handbook of Environmental Justice* Ryan Holifield,Jayajit Chakraborty,Gordon Walker,2017-09-14 The Routledge Handbook of Environmental Justice presents an extensive and cutting edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice With wide ranging discussion of current debates controversies and questions in the history theory and methods of environmental justice research contributed by over 90 leading social scientists natural scientists humanists and scholars from professional disciplines from six continents it is an essential resource both for newcomers to this research and for experienced scholars and practitioners The chapters of this volume examine the roots of environmental justice activism lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism empirical research and policy development throughout the world The Handbook features critical reviews of quantitative qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity transdisciplinarity and engaged research Instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice Providing detailed but accessible overviews of the complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists **Realism Discourse and Deconstruction** Jonathan Joseph,John Michael

Roberts,2004-05-05 Theories of discourse bring to realism new ideas about how knowledge develops and how representations of reality are influenced We gain an understanding of the conceptual aspect of social life and the processes by which meaning is produced This collection reflects the growing interest realist critics have shown towards forms of discourse theory and deconstruction The diverse range of contributions address such issues as the work of Derrida and deconstruction discourse theory Eurocentrism and poststructuralism What unites all of the contributions is a sense that it is essential to provide a realist alternative to the hitherto dominance of social constructionism hermeneutics and postmodernism over many of the issues discussed By developing a realist perspective the different authors attempt to embed discourse within the structured nature of the reality of the world Realism can situate language discourse and ideology within context specific or causally efficacious circumstances Realism can help to uncover issues of power representation and subjectivity and how discursive and other social practices produce real effects This can help us understand the manner in which non discursive social structures are reproduced through various forms of ideology and discourse And by knowing this we can start to address questions concerning human emancipation and how the world is to be transformed Just

Sustainabilities Julian Agyeman,Robert Bullard,Bob Evans,2012-04-27 Environmental activists and academics alike are realizing that a sustainable society must be a just one Environmental degradation is almost always linked to questions of human equality and quality of life Throughout the world those segments of the population that have the least political power and are the most marginalized are selectively victimized by environmental crises This book argues that social and environmental justice within and between nations should be an integral part of the policies and agreements that promote sustainable development The book addresses the links between environmental quality and human equality and between sustainability and environmental justice

When Nature Goes Public Cori Hayden,2020-07-21 Bioprospecting the exchange of plants for corporate promises of royalties or community development assistance has been lauded as a way to develop new medicines while offering southern nations and indigenous communities an incentive to preserve their rich biodiversity But can pharmaceutical profits really advance conservation and indigenous rights How much should companies pay and to whom Who stands to gain and lose The first anthropological study of the practices mobilized in the name and in the shadow of bioprospecting this book takes us into the unexpected sites where Mexican scientists and American companies venture looking for medicinal plants and local knowledge Cori Hayden tracks bioprospecting s contentious new promise and the contradictory activities generated in its name Focusing on a contract involving Mexico s National Autonomous University Hayden examines the practices through which researchers plant vendors rural collectors indigenous cooperatives and other actors put prospecting to work By paying unique attention to scientific research she provides a key to understanding which people and plants are included in the promise of selling biodiversity to save it and which are not And she considers the consequences of linking scientific research and rural enfranchisement to the logics of intellectual property Roving across UN

 futures **Ethnography and Law** Eve Darian-Smith, 2017-11-30 Ethnographies of law are historically associated with
 anthropology and the study of far away places and people In contrast this volume underscores the importance of
 ethnographic research in analyzing law in all societies particularly complex developed nations By exploring recent
 ethnographic research by socio legal scholars across a range of disciplines the volume highlights how an ethnographic
 approach helps in appreciating the realities of legal pluralism the subtle contradictions in any legal system and how legal
 meaning is constantly reproduced on the ground through the cultural frames and practices of peoples everyday lives The

Expose, Oppose, Propose William K. Carroll, 2016-07-15 Neoliberal capitalism positions us all as consumers in

a hypermarket where money talks For the majority of people around the globe this translates as precarity and immiseration But how can we break from this dominant ideological framework Expose Oppose Propose details how since the mid 1970s transnational alternative policy groups TAPGs have functioned as think tanks of a different sort generating resources for a globalization from below in dialogue with the critical social movements that are protagonists for global justice Based on two years of intensive research William Carroll not only provides a detailed examination of a variety of TAPGs showing how each group is distinctive and autonomous in its vision practical priorities and ways of producing and mobilizing alternative knowledge but also reveals how TAPGs form a master frame that advocates and envisages global justice and ecological wellbeing Treadmill of Production Kenneth A. Gould, David N. Pellow, Allan Schnaiberg, 2015-11-17 Schnaiberg's concept of the treadmill of production is arguably the most visible and enduring theory to emerge in three decades of environmental sociology Elaborated and tested it has been found to be an accurate predictor of political economic changes in the global economy In the global South it has figures prominently in the work of structural environmental analysts and has been used by many political economic movements Building new extensions and applications of the treadmill theory this new book shows how and why northern analysts and governments have failed to protect our environment and secure our future Using an empirically based political economic perspective the authors outline the causes of environmental degradation the limits of environmental protection policies and the failures of institutional decision makers to protect human well being
