The Problem of the Passions Cynthia Burack, 1995-03-01 Women says conventional wisdom are warm nurturing caregivers with an intrinsically enhanced capacity for attachment and compassion Feminists says the popular image are full of rage devoid of the feelings that are natural to women How have feminists themselves dealt with this dualism and more specifically with the disagreeable passions What has too often been missing from discussions of women's psychology in social theory is an account of women as ambivalent both empathic and enraged loving and hating The Problem of the Passions fills this void Examining the work of such feminist theorists as Carol Gilligan Nancy Chodorow Jessica Benjamin and Dorothy Dinnerstein in a new light Burack argues that feminist social theory can be repaired through attention to the pioneering psychoanalytic work of Melanie Klein Sure to be of interest to feminists psychoanalysts political scientists and social theorists The Problem of the Passions is essential reading for anyone concerned with feminism and questions of identity in social thought

Power and the Self Jeannette Marie Mageo, 2002-01-24 Power and the Self first published in 2002 deals with an important but neglected topic the ways in which power is experienced by individuals both as agents and as objects of the exercise of power Each contributor presents a series of case studies drawn from a variety of cultural contexts including the analysis of the appeal of Japanese superhero toys for American children the conditions that lead to dehumanising treatment of patients in an American nursing home the experiences of a Turkish immigrant woman in the Netherlands a contribution relating theories about the capacity to commit genocidal violence to everyday forms of violence and other cases from New Guinea and Samoa The introduction provides a readable historical review and synthesis of the theoretical ideas that provide the context for the work presented in the book

The Social Construction of Man, the State and War Franke Wilmer, 2004-04-16 Combining detailed analysis with a close reading of historical narratives documentary evidence and first hand interviews this is the first book on conflict to look seriously at the issue of ethnic identity and what it means for future peace

Healing Identities Cynthia Burack, 2018-08-06 Group identifications famously pose the problem of destructive

rhetoric and action against others Cynthia Burack brings together the theory work of women of color and the tools of psychoanalysis to examine the effects of group collaborations for social justice and progressive politics This juxtaposition illuminates some assumptions about race and equality encoded in psychoanalysis Burack s discursive analysis suggests the positive identity affirming aspects of group relational life for African American women One analytic response to groups emphasizes the dangers of these identifications and exhorts people to abandon or transcend them for their own good and for the good of others who may be harmed by group based forms of cultural or material violence Another response understands that people feel a need for group identifications and asks how they may be made more resistant to malignant group based discourse and action What can black feminist thought teach scholars and democratic citizens about groups Burack shows how the rhetoric of black feminism models reparative rather than destructive forms of group dialogue and action Although it may be impossible to eliminate group identifications that provide much of the impetus for bias and violence she argues we can encourage more progressive forms of leadership solidarity and coalition politics Freudian Analysts/Feminist Issues

Judith M. Hughes,1999-01-01 In this book Judith M Hughes makes a highly original case for conceptualizing gender identity as potentially multiple She does so by situating her argument within the history of psychoanalysis Hughes traces a series of conceptual lineages each descending from Freud In the study Helene Deutsch Karen Horney and Melanie Klein occupy prominent places So too do Erik H Erikson and Robert J Stoller Among contemporary theorists Carol Gilligan and Nancy Chodorow are included in Hughes s roster In each lineage Hughes discerns an evolutionary narrative Deutsch tells a story of retrogression Erikson names his epigenesis and Gilligan continues in that vein Horney s discussion recalls sexual selection Stoller s and Chodorow s theorizing brings artificial selection to mind and finally in Klein s work Hughes sees a story of natural selection and adds to it her own notion of multiple gender identities **Feminist Theories and Social Work**

Christine Flynn Saulnier,2014-02-25 This invaluable guidebook accomplishes what many others on feminist theory do not It reviews both the theories and the applications of the field Too frequently books and articles tend to focus on one or two ways for practicing feminism when in reality different problems different groups of women and different goals may require a different theory for guiding objectiveness strategies and work style Using the wrong theory for a particular group or problem may backfire causing unexpected outcomes This book circumvents such unforeseen results Feminist Theories and Social Work reviews the most important theories of today evaluates the contributions and limitations of each branch and for each theory provides application examples at several levels of intervention *Psychoanalytic Versions of the Human Condition*

Paul Marcus,Alan Rosenberg,1998-08 What is psychoanalysis Whereas there was once a time when proponents of mainstream psychoanalysis could point to the preeminence of Freud s drive theory and the version of the human condition associated with it man as seeking pleasure in an erotically tinged universe contemporary psychoanalysis is a fractured and contentious discipline in which competing theories share little more than the basic concepts of unconscious mental processes

repression and transference Taking the complexities ambiguities and contradictions engendered by psychoanalysis over the past several decades as an encouraging point of departure rather than as evidence of the dissolution of the psychoanalytic tradition *Psychoanalytic Versions of the Human Condition* makes explicit how within each major theory a particular story about the nature of the world and what it means to be human decisively shapes how the clinician conceptualizes individual psychopathology and approaches treatment A chorus of voices that both challenges and reaffirms the theory and practice of psychoanalysis *Psychoanalytic Versions of the Human Condition* asks urgent questions about the politics of psychoanalytic knowledge and about how the profession is situated and operates in our contemporary culture Whether Freudian Jungian Kleinian Kohutian Lacanian or hybrid the clinician will find this book a useful guide to understanding how each theory's philosophy of life infuses clinical work

The Artistry of Anger Linda M. Grasso, 2003-04-03 In this compelling interdisciplinary study Linda Grasso demonstrates that using anger as a mode of analysis and the basis of an aesthetic transforms our understanding of American women's literary history Exploring how black and white nineteenth century women writers defined expressed and dramatized anger Grasso reconceptualizes antebellum women's writing and illuminates an unrecognized tradition of discontent in American literature She maintains that two equally powerful forces shaped this tradition women's anger at their exclusion from the democratic promise of America and the cultural prohibition against its public articulation Grasso challenges the common notion that nineteenth century women's writing is confined to domestic themes and shows instead how women channeled their anger into art that addresses complex political issues such as slavery nation building gender arrangements and race relations Cutting across racial and genre boundaries she considers works by Lydia Maria Child Maria W Stewart Fanny Fern and Harriet Wilson as superb examples of the artistry of angry expression Transforming their anger through literary imagination these writers bequeathed their vision of an alternative America both to their contemporaries and to subsequent generations

Tough Love Cynthia Burack, 2014-02-01 Exposes how ex gay and postabortion ministries operate on a shared system of thought and analyzes their social implications A staple of the culture wars the struggle between Christian conservatives and progressives over sexuality and reproductive rights continues Focusing on ex gay ministries geared to helping same sex attracted people resist their sexuality and postabortion ministries dedicated to leading women who have had an abortion to repent that decision Cynthia Burack argues that both are motivated

and characterized by a strain of compassion that is particular to Christian conservatism rather than a bias and hatred toward sexual minorities and sexually active women This compassion reproduces the sexual ideology of the Christian right and absolves Christian conservatives from responsibility for stigma and other forms of harm to postabortive and same sex attracted people Using the democratic theory of Hannah Arendt the popular fiction of Ayn Rand and the psychoanalytic thought of Melanie Klein Burack studies the social and political effects of Christian conservative compassion **Playing with Fire** Shane Phelan,2020-04-03 The last five years have witnessed the birth of a vibrant new group of young scholars who are writing about queer law politics and policy topics which are no longer treated as of interest only to lesbians and gay men but which now garner the attention of political theorists of all stripes *Playing With Fire* the first scholarly collection on queer politics by US political theorists opens the intersection of lesbian and gay studies and political theory to a wide audience It covers a wide range of issues including the theory of queer identities the contrasts among ethnic racial and sexual identities the debate between liberals and communitarians the right to privacy and the meaning of equal citizenship

Psychosis and Power James M. Glass,1995 Glass s analysis bridges contemporary psychoanalytic and political theory and centers on case studies as well as small group interactions at the hospital Focusing on psychotic patients own perceptions he describes the loss of their ability to participate in consensual reality and to sustain the respect for rights and tolerance of differences which make reciprocal relationships possible Their experience Glass maintains vividly illuminates larger political issues and points in particular to the psychotic bases of political tyranny Pursuing omnipotence closing off dialogue creating scapegoats and promoting violence the tyrant elevates to matters of public policy those patterns of behavior that in an individual would be considered psychotic Historical Dictionary of Feminism Janet K. Science & Emotions after 1945 Frank Biess, Daniel M. Gross, 2024-05-31 Through the first half of the twentieth century emotions were a legitimate object of scientific study across a variety of disciplines After 1945 however in the wake of Nazi irrationalism emotions became increasingly marginalized and postwar rationalism took central stage Emotion remained on the scene of scientific and popular study but largely at the fringes as a behavioral reflex or as a concern of the private sphere So why by the 1960s had the study of emotions returned to the forefront of academic investigation In Science and Emotions after 1945 Frank Biess and Daniel M Gross chronicle the curious resurgence of emotion studies and show that it was fueled by two very different sources social movements of the 1960s and brain science A central claim of the book is that the relatively recent neuroscientific study of emotion did not initiate but instead consolidated the emotional turn by clearing the ground for multidisciplinary work on the emotions Science and Emotions after 1945 tells the story of this shift by looking closely at scientific disciplines in which the study of emotions has featured prominently including medicine psychiatry neuroscience and the social sciences viewed in each case from a humanities perspective
