

Différentielle des fonctions

Par K. Tazaïrt

Introduction :

En mathématiques, une fonction (ou application) est une relation de dépendance entre deux ensembles, établie de telle manière qu'à chaque élément (x) de l'ensemble de départ est associé, au plus, un élément (y) de l'ensemble d'arrivée. La variable x est appelée variable indépendante, et la variable y , variable dépendante. Cette relation est symbolisée par l'expression $y = f(x)$.

L'étude d'une fonction passe par plusieurs étapes :

- Détermination du domaine de définition
- Restriction du domaine d'étude
- Calcul des limites aux bornes du domaine de définition
- Calcul de la dérivée
- Étude du signe de la dérivée
- Élaboration du tableau de variation
- Étude du signe de la fonction
- Recherche d'asymptotes
- Études particulières pouvant faciliter le tracé
- Tracé de la courbe

La dérivée :

Parmi les étapes de l'étude d'une fonction, le calcul de la dérivée.

La dérivée c'est la notion de mesure instantanée. Elle permet de connaître les **variations des fonctions**, c'est-à-dire avec quel taux elles augmentent ou diminuent sur un intervalle donné.

En effet, la **dérivée** d'une fonction est une généralisation du coefficient directeur des fonctions affines. La dérivation est primordiale dans la modélisation de plusieurs situations de la vie réelle, tels que la croissance des populations ou le comportement des marchés financiers.

The Five-Factor Model of Personality Across Cultures Robert R. McCrae, Juri Allik, 2012-12-06 ROBERT R MCCRAE it is simply personality research conducted in different countries The implicit assumption behind this practice is that personality processes are universal and where they are studied is thus of no consequence An insensitivity to cultural context once imputed mostly to Americans now appears to characterize the field worldwide Fortunately recent years have also seen a rise of interest in studies of personality and culture Church 2001 Church Lee McCauley McCrae 2000 What do these new studies show Are personality processes indeed universal or are there significant variations across cultures that necessitate a more nuanced approach to research There is as yet no definitive answer to that question In some respects human personality does seem to transcend the boundaries of language and culture in other respects it is profoundly influenced by social and historical forces Sorting these issues out must be a priority for our field if we are to understand the current personality literature

Butler, L.C.R. Restaino-Baumann, V.L. Shulman, 2012-12-06 Until recently most books and articles on Piaget s theory whether laudatory or critical were written by psychologists or more rarely epistemologists who had had no direct contact with the research that provided the basis for the theoretical constructs nor with the ongoing work on the theory itself These authors who looked into the theory so to speak from the outside often noted aspects that were less visible to those working inside the theory and in this way raised a number of important questions However because most of these authors were psychologists they often overlooked the main thrust of Piaget s work which is epistemological Many complained about a gap between the theory and the experimental data as reported Such criticism may be justified at least in part if the theory is taken to be a psychological theory But Piaget himself always emphasized his epistemological orientation with this in view the methodology

of the research and its links to the conceptual framework of the theory appear in a different guise The value of a given methodology depends on its contribution to the theory for which it was designed The gap between theory and experiment that was frequently criticized is in fact the gap between the psychological and the epistemic subject *Current Catalog National Library of Medicine (U.S.)*,1982 First multi year cumulation covers six years 1965 70 *National Library of Medicine Current Catalog National Library of Medicine (U.S.)*,1965 **Psychological Science in the USSR.** Institut psikhologii (Akademii pedagogicheskikh nauk RSFSR),1961 **Traité de psychologie appliquée: La psychologie différentielle.
