including wraparound services multisystemic treatment MST futures planning and person centred planning As systems of care are different across countries and cultures it is imperative that we share our knowledge and make explicit the lessons we have learned in our attempts to provide services to children and adolescents which focus on improving their quality of life rather than merely treating their psychiatric disorders and psychological problems There is an urgent need to evaluate the various treatments being offered to children and adolescents with mental health needs Empirical data on outcomes will determine the funding and delivery of services As such the latest research on treatment outcomes needs to be disseminated so that new and validated treatment methods can be implemented rapidly
