Embodiment, Ego-Space, and Action

Roberta L. Klatzky, Brian MacWhinney, Marlene Behrmann, 2008-06-20 The majority of research on human perception and action examines sensors and effectors in relative isolation What is less often considered in these research domains is that humans interact with a perceived world in which they themselves are part of the perceptual representation as are the positions and actions potential or ongoing of other acti

The Oxford Handbook of Ecocriticism Greg Garrard, 2014 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Cheryll Glotfelty and Jonathan Bate a number of key second wave ecocritics and the best up and coming scholars Topics covered include Green Shakespeare the Bard s subversive uses of the pastoral John Clare s sacred relationship with the land Thoreau s profound political passion the natural landscape as symbol of postcolonial resistance in works by Lessing Naipaul and Coetzee the relation between feminism and environmentalism language and the concept of biosemiotics and concerns over pollution and toxicity in films like Erin Brockovitch Michael Clayton and Al Gore s An Inconvenient Truth

Physicalism and Mental Causation Sven Walter, Heinz-Dieter Heckmann, 2003 This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency Physicalism the thesis that everything there is in the world including human minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades Yet there is no generally accepted definition for most of the core notions of

physicalism including fundamental notions such as causation determination realization or even physicalism itself This lack of an unanimous conceptual foundation for the physicalist agenda impedes the solution of more specific problems in the philosophy of mind for instance problems pertaining to mental causation and human agency As of yet a comprehensive philosophical reflection on various key concepts and how they relate to the more specific problems physicalism attempts to solve is still missing This book presents a range of essays written by established and leading authors in the field on the conceptual foundations of physicalism and its interconnections with philosophical problems concerning mental causation and human agency

The Myth of Research-Based Policy and Practice Martyn Hammersley, 2013-03-13 Martyn Hammersley's provocative new text interrogates the complex relationship between research policymaking and practice against the background of the evidence based practice movement Addressing a series of probing questions this book reflects on the challenge posed by the idea that social research can directly serve policymaking and practice Key questions explored include Is scientific research evidence based What counts as evidence for evidence based practice Is social measurement possible and is it necessary What are the criteria by which qualitative research should be judged The book also discusses the case for action research the nature of systematic reviews proposals for interpretive reviews and the process of qualitative synthesis Highly readable and undeniably relevant this book is a valuable resource for both academics and professionals involved with research

Embodied Communication in Humans and Machines Ipke Wachsmuth, Manuela Lenzen, Günther Knoblich, 2008-09-04 When people communicate face to face they don't just exchange verbal information Rather communication encompasses the whole body Communication partners synchronize their body sway and mimic or imitate each other's body postures and actions They produce a multitude of manual and facial gestures that help to illustrate what is being said show how communication partners feel or or reveal verbal deception Moreover face to face communication takes place in shared contexts where partners jointly attend and refer to the same objects often while working on joint tasks such as carrying a table or repairing a car together Traditionally communication research has neglected these parts of communication using the engineering model of signal transmission as the main theoretical metaphor This book takes a new look at recent empirical findings in the cognitive and neurosciences showing that the traditional approach is insufficient and presenting a new interdisciplinary perspective the Embodied Communication perspective The core claim of the Embodied Communication perspective is that human communication involves parallel and highly interactive couplings between communication partners These couplings range from low level systems for performing and understanding instrumental actions like the mirror system to higher systems that interpret symbols in a cultural context The book can also serve as a guide for engineers who construct artificial agents and robots that should be able to interact with humans

Rudolf Steiner Bo Dahlin, 2017-06-22 This book covers Rudolf Steiner's biography presented from an educational point of view and also unfolds the different aspects of Steiner's educational thought in Waldorf Education His point of view is unique in that it

relates education to a wide horizon of different contexts such as social pedagogical evolutionary and spiritual aspects His ideas are philosophical ethical epistemological ontological However above all they are based on spiritual understanding of the human being and the world In many ways they stand in stark contrast to the views that inform present mainstream educational thought and practice Nevertheless there are points where Steiner s ideas can find a resonance in more recent educational thought Steiner was in many ways ahead of his time and his educational ideas are still relevant to many present day educational issues and problems

Being Alongside Alf Coles, 2013-06-13 How do you establish a classroom culture in which students routinely conjecture and think mathematically How do you establish a way of working with teachers using video in which discussion supports professional development The present book offers answers to these questions through an in depth enactivist study of one exceptional teacher in one innovative mathematics department in the UK The book reveals some striking parallels between working to support students mathematical thinking and working to support teacher learning A case is made for the importance of metacommunication in both contexts communication about the communications that are occurring For example there is compelling evidence from a classroom that metacommunication linked to the words conjecture and becoming a mathematician supports student metacognition and mathematical thinking In working with teachers or students offering these powerful metacommunications seems to require a heightened listening With a heightened listening attention is placed not just in what is said but in what kind of a thing is said with the teacher or facilitator being alongside the individuals in the wider group Read this book if you re a teacher for insights into how one teacher establishes a classroom culture where her children are doing mathematics being mathematicians and reflect on what you want in your own classroom Read this book if you re a teacher educator to reflect on parallels between teaching and running professional development sessions particularly using video If you do not fit in either of these categories read this book and use stories in your life Laurinda Brown University of Bristol

The Hand, an Organ of the Mind Zdravko Radman, 2013-05-10 Theoretical and empirical accounts of the interconnectedness between the manual and the mental suggest that the hand can be understood as a cognitive instrument Cartesian inspired dualism enforces a theoretical distinction between the motor and the cognitive and locates the mental exclusively in the head This collection focusing on the hand challenges this dichotomy offering theoretical and empirical perspectives on the interconnectedness and interdependence of the manual and mental The contributors explore the possibility that the hand far from being the merely mechanical executor of preconceived mental plans possesses its own know how enabling enhanced beings to navigate the natural social and cultural world without engaging propositional thought consciousness and deliberation The contributors consider not only broad philosophical questions ranging from the nature of embodiment enaction and the extended mind to the phenomenology of agency but also such specific issues as touching grasping gesturing sociality and simulation They show that the capacities of the hand include perception on its own and in association with other modalities action extended cognition social interaction and communication Taken together their accounts offer a handbook of cutting edge research exploring the ways that the manual shapes and reshapes the mental and creates conditions for embodied agents to act in the world Contributors Matteo Baccarini Andrew J Bremner Massimiliano L Cappuccio Andy Clark Jonathan Cole Dorothy Cowie Natalie Depraz Rosalyn Driscoll Harry Farmer Shaun Gallagher Nicholas P Holmes Daniel D Hutto Angelo Maravita Filip Mattens Richard Menary Jesse J Prinz Zdravko Radman Matthew Ratcliffe Etienne B Roesch Stephen V Shepherd Susan A J Stuart Manos Tsakiris Michael Wheeler *Computational Science - ICCS 2001* Vassil N.
