Reclaiming Democracy:

Reclaiming Democracy Meta Mendel-Reyes, 2013-10-11 Meta Mendel Reyes provides a critical look at our fascination with the sixties discusses the ways in which democratic participation was at the heart of sixties politics and explores the interrelationship between the history and memory of the sixties and contemporary democratic politics Mendel Reyes stresses that if told properly the story of the sixties could help open our eyes to the possibility that ordinary people can take democratic action and do have the ability to make a difference in nineties politics In a time of cynicism about the American government's ability to solve the crises of inequality poverty and racism Mendel Reyes puts the decline of political participation in historical context and provides hope for the coming decades *College Teaching and Learning for Change* Margaret A. Miller, 2017-03-27 Students and faculty come together in this powerful collection to discuss experiences and teaching practices that can change students' lives Organized into four parts these first person accounts explore the many challenges facing college students offering advice on how to best serve low income first generation underrepresented student populations how to foster political engagement and how to help students take charge of their lives and education The stories in *College Teaching and Learning for Change* provide higher education faculty and student affairs practitioners with an increased understanding of the wide variety of student experiences and together they constitute a platform for encouraging student success We Are Not Able to Live in the Sky Mara Kardas-Nelson, 2024-06-11 Shortlisted for the J Anthony Lukas Prize A deeply reported work of journalism that explores the promises and perils of microfinance told through the eyes of international lenders and women borrowers in West Africa In the mid 1970s Muhammad Yunus an American trained Bangladeshi economist met a poor female stool maker who needed money to expand her business In an act widely known as the beginning of microfinance Yunus lent 27 to forty two women hoping small credit would help the women pull themselves out of poverty Soon Yunus's Grameen Bank was born and the idea of giving very small high interest loans to poor people took off In 2006 Yunus and the Grameen Bank won the Nobel Peace Prize for efforts to create economic and social development from below But there's a problem with this story There are mounting concerns that these small loans are as likely to bury poor people in debt as they are to pull them from poverty with borrowers from India to Kenya facing consequences such as jail time and forced land sales Reportedly hundreds have even committed suicide What happened Did microfinance take a wrong turn or was it flawed from the beginning Mara Kardas Nelson's *We Are Not Able to Live in the Sky* is about unintended consequences blind optimism and the decades long ramifications of seemingly small policy choices The book is rooted in the stories of women borrowers in Sierra Leone West Africa Their narratives woven through a deep history of modern international development are set against the rise of Yunus's vision that tiny loans would put poverty in museums Kardas Nelson asks What is missed with a single financially focused solution to global inequity that ignores the real drivers of poverty Who stands to benefit and more important who gets left behind **Performing Citizenship** Inbal

Ofer, Tamar Groves, 2015-12-07 In this book Tamar Groves and Inbal Ofer explore the effects of social movements activism on the changing practices and conceptions of citizenship Presenting empirically rich case studies from Latin America Asia and Europe leading experts analyze the ways in which the shifting balance of power between nation state economy and civil society over the past half century affected social movements in their choice of addressees and repertoires of action Divided into two parts the first part focuses on citizenship as a form of political and cultural participation The three case studies that make up this section look into the ways in which social movements activism prompted a critical re evaluation of two central questions Who can be considered a citizen And what forms of political and cultural participation effectively enable citizens to exercise their rights The second section focuses on citizenship as a form of community building The three case studies that are included in this section address the ways in which activism fosters new forms of advocacy and communication leading to the emergence of new communities and assigning qualities of fraternity to the status of citizenship Throughout most of the 20th century social movements literature focused on the challenges these entities posed to the state since it was the state that had the capacity and willingness to grant social and economic concessions This situation started to shift in the late 1960s By the 1980s the existing configuration between the state civil society and the economy was increasingly challenged by market penetration Accordingly we witness a proliferation of social movements that no longer target state institutions or do so only partially Their repertoires of action interact continuously with everyday practices re shaping demands within specific organizational legislative and political contexts As a result such activism expands the understanding of the concept of citizenship so as to include demands relating to livelihood division of resources the production and dissemination of knowledge and forms of civic participation and solidarity Written for scholars who study social movements citizenship and the relationship between the state and civil society over the past half century this book provides a fresh insight on the nature of citizenship increasingly framing the condition of being a citizen in terms of performance and on going practices rather than simply in relation to the attainment of a formal status A Time of Change: A New Era for American Politics Pasquale

De Marco, 2025-05-18 In a time of profound change and uncertainty America stands at a crossroads The erosion of trust in government institutions the rise of political apathy and the widening partisan divide have left many Americans feeling disillusioned and disengaged from the political process This book offers a timely and insightful exploration of the challenges and opportunities facing American politics today Drawing on a deep understanding of history and current events the author argues that the Left has a critical role to play in shaping a better future for America However to do so it must undergo a period of renewal and transformation The book delves into the root causes of the Left s decline and proposes a path forward It emphasizes the importance of developing a unified and progressive agenda that addresses the concerns of all Americans regardless of race gender class or sexual orientation The book also highlights the power of civic engagement and grassroots movements in revitalizing American democracy With clarity and conviction the author argues that the Left must embrace

diversity fight for economic justice protect the environment and promote a new era of ethical and transparent leadership Only then can America truly live up to its ideals of liberty equality and justice for all This book is a must read for anyone who cares about the future of American democracy It is a call to action a clarion call for all Americans to come together and work towards a better future It is a vision of a nation where every voice is heard where justice prevails and where the American Dream is within reach for all If you like this book write a review on google books [The Work of Reading](#) Anirudh Sridhar,Mir Ali Hosseini,Derek Attridge,2021-05-17 The Work of Reading Literary Criticism in the 21st Century is a sustained critical examination of the developments in the field of literary studies from the early 2000s onwards within the context of the systematic problems in the humanities This volume analyzes the origins of the current methods including New Historicism empiricism New Formalism postcritique and others and posits alternatives to the present state of literary studies At a time when many aspects of current methods show a desire to adopt values from other disciplines to solve internal crises this volume advocates a renewed focus on questions of form by means of the praxis of aesthetic study close reading and other modes of engaging directly with literary texts *Political Theory and the Enlarged Mentality* Stephen Acreman,2017-10-20 In this book Stephen Acreman follows the development and reception of a hitherto under analyzed concept central to modern and postmodern political theory the Kantian *ein erweiterte Denkungsart* or enlarged mentality While the enlarged mentality plays a major role in a number of key texts underpinning contemporary democratic theory including works by Arendt Gadamer Habermas and Lyotard this is the first in depth study of the concept encompassing and bringing together its full range of expressions A number of attempts to place the enlarged mentality at the service of particular ideals the politics of empathy of consensus of agonistic contest or of moral righteousness are challenged and redirected In its exploration of the enlarged mentality the book asks what it means to assume a properly political stance and in giving as the answer facing reality together it uncovers a political theory attentive to the facts and events that concern us and uniquely well suited to the ecological politics of our time *The Will to Empower* Barbara Cruikshank,2019-06-30 How do liberal democracies produce citizens who are capable of governing themselves In considering this question Barbara Cruikshank rethinks central topics in political theory including the relationship between welfare and citizenship democracy and despotism and subjectivity and subjection Drawing on theories of power and the creation of subjects Cruikshank argues that individuals in a democracy are made into self governing citizens through the small scale and everyday practices of voluntary associations reform movements and social service programs She argues that our empowerment is a measure of our subjection rather than of our autonomy from power Through a close examination of several contemporary American technologies of citizenship from welfare rights struggles to philanthropic self help schemes to the organized promotion of self esteem awareness she demonstrates how social mobilization reshapes the political in ways largely unrecognized in democratic theory Although the impact of a given reform movement may be minor the techniques it develops for creating citizens far extend the reach of governmental authority

Combining a detailed knowledge of social policy and practice with insights from poststructural and feminist theory *The Will to Empower* shows how democratic citizens and the political are continually recreated Constituting Economic and Social Rights Katharine G. Young, 2012-08-23 Food water health housing and education are as fundamental to human freedom and dignity as privacy religion or speech Yet only recently have legal systems begun to secure these fundamental individual interests as rights This book looks at the dynamic processes that render economic and social rights in legal form It argues that processes of interpretation enforcement and contestation each reveal how economic and social interests can be protected as human and constitutional rights and how their protection changes public law Drawing on constitutional examples from South Africa Colombia Ghana India the United Kingdom the United States and elsewhere the book examines innovations in the design and role of institutions such as courts legislatures executives and agencies in the organization of social movements and in the links established with market actors This comparative study shows how legal systems protect economic and social rights by shifting the focus from minimum bundles of commodities or entitlements to processes of value based deliberative problem solving Theories of constitutionalism and governance inform the potential of this approach to reconcile economic and social rights with both democratic and market principles while addressing the material inequality poverty and social conflict caused in part by law itself **Transition Strategies for Sustainable Community Systems**

Amar KJR Nayak, 2019-01-23 This book presents five critical dimensions on relationships institutions production organisation and governance from design and systems perspectives for the systematic transition of unstable and vulnerable communities across the world to sustainable community systems The first section discusses features of relationships and processes to deep cooperation and trust within a community The second section examines institutions within and outside a district to foster synergy across institutions within a district and to minimise negative externalities on local communities within a district The third section deals with food production systems that are nature friendly resilient efficient and sustainable The fourth section discusses the design of producer organisations that can graduate to become sustainable community enterprise systems The fifth section focuses on community governance that can facilitate decentralised participatory transparent and democratic local governance systems This book offers a fresh perspective on design thinking for optimising internal design consistencies provides a systems perspective on building sustainable community systems at the lowest governance unit in different countries such as Ward Gram Panchayat Panchayat Council Gewong Union Council GN gives insights into design systems perspectives towards building sustainable community systems within a district of any country across the world
