Kuznar, 2008-09-11 This second edition of *Reclaiming a Scientific Anthropology* arrives at just the right time as new advances in science increasingly affect anthropologists of all stripes Lawrence Kuznar begins by reviewing the basic issues of scientific epistemology in anthropology as they have taken shape over the life of the discipline He then describes postmodern and other critiques of both science and scientific anthropology and he concludes with stringent analyses of these debates This new edition brings this important text firmly into the 21st century it not only updates the scholarly debates but it describes new research techniques such as computer modeling systems that could not have been imagined just a decade ago In a field that has become increasingly divided over basic methods of reasearch and interpretation Kuznar makes a powerful argument that anthropology should return to its roots in empirical science
