When Rights Embrace Responsibilities Giulia Sajeve, 2018-04-16 The conservation of environment and the protection of human rights are two of the most compelling needs of our time Unfortunately they are not always easy to combine and too often result in mutual harm This book analyses the idea of biocultural rights as a proposal for harmonizing the needs of environmental and human rights These rights considered as a basket of group rights are those deemed necessary to protect the stewardship role

that certain indigenous peoples and local communities have played towards the environment With a view to understanding the value and merits as well as the threats that biocultural rights entail the book critically assesses their foundations content and implications and develops new perspectives and ideas concerning their potential applicability for promoting the socio economic interests of indigenous people and local communities It further explores the controversial relationship of interdependence and conflict between conservation of environment and protection of human rights Guide to Rights and Responsibilities in Resolving Disputes Within the Federal Workforce ,1988 **Parental Rights and Responsibilities**

Obligations of Non-Recognized De Facto Regimes in International Law: The Case of 'Somaliland' Michael Schoiswohl,2004-04-01 This volume contains the first comprehensive study of legal issues arising with regard to the self declared Republic of Somaliland which after more than 10 years of factual existence is still facing international non recognition The case of Somaliland in particular its unique position within the collapsed State of Somalia challenges current international law doctrine regarding the interplay between non recognition and the creation of States Based upon an in depth analysis of international law concerning the criteria of statehood and recognition the author presents a legal framework against which cases of secession in the context of collapsed States should be measured In applying this framework to the

case of Somaliland he demonstrates that the entity has established a sufficient level of peace stability and effective governance to qualify as a State under international law Given the legal uncertainty surrounding non recognized de facto regimes such as Somaliland the study finally attempts to identify legal rules which bind de facto regimes in the process of secession irrespective of their recognition as a State Proposing a functional approach to de facto regimes the author argues that such entities are subject to obligations under international human rights law to the extent they are assuming governmental tasks

Reading Ricoeur through Law Eileen Brennan, Marc de Leeuw, George H. Taylor, 2022-01-25 Reading Ricoeur through Law edited by Marc de Leeuw George H Taylor and Eileen Brennan is the first collection of essays solely focused on Ricoeur

s thinking about law bringing together both established and emerging scholars to offer a systematic and critical examination of Ricoeur's legal thinking. The chapters not only explore the specific contribution Ricoeur makes to the field of jurisprudence but also examine how Ricoeur's work on law fits complements or changes his overall anthropology, phenomenology and hermeneutics. The book provides a complex insight into how law, ethics and politics intertwine both from within law as normative rule setting as well as through the wider social, political and historical context in which law and legal institutions affect our inter-subjective and communal life as lived with and for others in just institutions. The collection also makes available in English *The Just between the Legal and the Good*, a key text in Ricoeur's reflections about law and justice. The core topics of this collection are rights, justice, responsibility, judging, interpretation, argumentation, punishment and authority but contributors also offer original insights in how Ricoeur's philosophical reconceptualization of symbolism, action, ideology, narrative, selfhood, testimony, history, trauma, reconciliation, justice and forgiveness can be made productive for our understanding of law and legal institutions.

Armed Non-State Actors in International Humanitarian and Human Rights Law Konstantinos Mastorodimos, 2017-05-15. The accountability of armed non-state actors is a neglected field of international law overtaken by the regimes of state responsibility and individual criminal accountability as well as fears of legitimacy. Yet armed non-state actors are important players in the international arena and their activities have significant repercussions. This book focuses on their obligations and accountability when they do not function as state agents regardless of the existence or extent of accountability of their individual members. The author claims that their distinct features lead to their classification into three different types: de facto entities, armed non-state actors in control of territory and common article 3 armed non-state actors. The mechanisms that trigger the applicability of humanitarian and human rights law regimes are examined in detail as well as the framework of obligations. In both cases the author argues that armed non-state actors should not be treated as entering international law and process exclusively through the state. The study concludes by focussing on their accountability in international humanitarian and human rights law and more specifically to the rules of attribution, remedies and reparations for violations of their primary obligations.

Traditional Religion and Culture in a New Era Reimon Bachika,2017-12-04 Where will postmodern culture lead us in the twenty first century Will it destroy traditional cultures together with the old established religions that were its foundation These questions and the new concerns they evoke are explored in this important collection of original essays Contributors challenge entrenched assumptions about what many social scientists consider irreversible cultural trends These include cultural differentiation emphasis on individual identity movement toward religion as a private act rather than a community commitment and above all emphasis on the relativity of all knowledge and values The volume asserts three lines of argument in opposition to these trends The first is the teleological significance of traditional religions and archaic knowledge History can be said to have no goal but the same must not follow for human culture One can conceive individually of a hundred goals to live for However the quality of life cannot be that diverse Taken to the extreme cultural particularity and philosophical nihilism are insults to the life that emerged on our planet eons ago Second this volume emphasizes moral concern and the importance of universal values Ideas of human well being have been formulated from ancient times Religious beliefs invariably contain statements of value in the form of commandments and exhortations that express fundamental goals for a quality of life Third the nature of religion and spirituality is discussed Religion today has become controversial socially and marginal sociologically The role of religion in society is sometimes problematic or abused but it is also underestimated and misunderstood The authors suggest that contemporary religion might best be viewed as non ideological spiritual culture This in turn looks to a future in which religion and culture coalesce This volume includes an international cast of scholars from Japan the United States Canada the United Kingdom Germany Greece Italy New Zealand and Belgium All have engaged in research outside their own countries Taken as a whole this volume addresses issues of interest to those in the fields of futures studies religion and philosophy and in particular those concerned with human agency personal responsibility and public choice
