explores these motivation related influences on memory and considers whether a common mechanism underlies them all Part IV changes the focus discussing how we sometimes want to remember specific information that does not automatically capture our attention The book considers evidence based learning strategies and memory strategies whilst also exploring real world applications with discussion of professions that accomplish amazing memory feats daily The book concludes with a reflection on how the role of memory is changing as our world makes information increasingly accessible particularly with the ever expanding influence of the internet Drawing from a variety of literatures and perspectives this important book will be relevant for all students of memory from psychology cognitive neuroscience and related health backgrounds **Earliest**
