Peptide Growth Factors and Their Receptors I Michael B. Sporn, Anita B. Roberts, 2012-12-06 This two volume treatise the collected effort of more than 50 authors represents the first comprehensive survey of the chemistry and biology of the set of molecules known as peptide growth factors Although there have been many symposia on this topic and numerous publications of reviews dealing with selected subsets of growth factors the entire field has never been covered in a single treatise It is essential to do this at the present time as the number of journal articles on peptide growth factors now makes it almost impossible for anyone person to stay informed on this subject by reading the primary literature At the same time it is becoming increasingly apparent that these substances are of universal importance in biology and medicine and that the original classification of these molecules based on the laboratory setting of their discovery as growth factors lymphokines cytokines or colony stimulating factors was quite artifactual they are in fact the basis of a common language for intercellular communication As a set they affect essentially every cell in the body and in this regard they provide the basis to develop a unified science of cell biology germane to all of biomedical research This treatise is divided into four main sections After three introductory chapters its principal focus is the detailed description of each of the major peptide growth factors in 26 individual chapters

Lipoproteins as Carriers of Pharmacological Agents Michael Shaw, 1991-06-21 Explores endogenous lipoprotein particles and their interaction with pharmacological agents Among the topics are receptor dependent interactions of lipoproteins with tissues and cell types their uptake and transport with the vascular endothelium therapeutic and chemical agents that associate in v

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1988 *Cytokines: Interleukins and Their Receptors* Razelle Kurzrock, Moshe Talpaz, 2012-12-06 Over the last decade cytokine research has emerged as one of the most exciting and critical fields for providing fundamental knowledge of normal and abnormal human development Today it is apparent that cytokines orchestrate growth from the early embryonic stage to maturity and are responsible for the normal function of virtually every organ system Furthermore virtually all disease states have been associated at least in part with cytokine aberrations In this volume the editors have brought together

internationally known experts in the field of interleukin research to provide a comprehensive review of the biology of the interleukins and their role in both health and illness while maintaining a balance between the basic science and clinical aspects Cytokines Interleukins and their Receptors should be of interest to a wide variety of researchers including clinical hematologists oncologists immunologists in addition to medical and PhD students and researchers with an interest in cytokines

Epidermal Langerhans Cells Gerold Schuler, 2024-12-20 Epidermal Langerhans Cells focuses on epidermal Langerhans cells LCs and the important role they play in the induction of contact hypersensitivity and graft rejection This in depth work discusses how these antigen presenting cells are modulated by various physicochemical agents such as UV light

and how they can be infected by the AIDS virus It also reveals that cytokines mediate their development into potent T cell stimulatory dendritic cells This comprehensive review covers important experimental details and methods and fascinating information on LCs It also provides an overview of the immune system as it relates to the skin in health and disease This up to date publication is an indispensable resource for all investigative and clinical dermatologists as well as immunologists interested in antigen presenting cells

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70

Interferon and Nonviral Pathogens Gerald. I. Bryne, Jenifer Turco, 2021-05-30 This book explores the important role of the interferons in infections due to nonviral intracellular pathogens It deals with the induction of interferons by a variety of intracellular microorganisms and the effects of interferons on the host cells and the microorganisms

Immunodiagnosis of Cancer M.d d., 2017-11-22 Updated to reflect changes in the field since publication of the first edition in 1979 Provides a detailed review of the methodology available for assessing the diagnosis and prognosis of cancer patients including data on the application of tumor marker assays and other immunodiagnostic procedures

Systemic Autoimmunity P. E. Bigazzi, 1991-08-30 Surveys the biotechnologically influenced advances in the understanding of systemic autoimmune disorders highlighting recent research using cell biology and biochemistry the cloning of immune cells recombinant DNA and molecular genetics Among the topics are the role of complement in inflammation

Lymphokines Anne S. Hamblin, 1988 The past three years have seen an explosion of knowledge on lymphokines This textbook focuses on the structures and functions of the newly characterized lymphokines and brings together detailed information from many primary sources

Cytokines in Animal Health and Disease Michael J. Myers, Michael P. Murtaugh, 2020-08-26 This work offers comprehensive up to date coverage of cytokine biology in veterinary and agricultural species describing the role of cytokines in physiological and pathological processes It addresses recent advances and new information on the function of cytokines in reproduction detoxification of xenobiotics growth modulation and other areas and discusses the approaches to and pitfalls of studying cytokines in animals

Principles of Cancer Biotherapy R.K. Oldham, 2012-12-06 At the time of the first edition of Principles of Cancer Biotherapy this book represented the first comprehensive textbook on biological therapy Whereas in 1991 when the second edition was published there was still some doubt on the part of many oncologists and cancer researchers as to the therapeutic value of these new approaches it is now generally agreed that biopharmaceuticals are producing major opportunities for new cancer therapies Cancer biotherapy has truly matured into the fourth modality of cancer treatment The third edition is now needed as a result of the tremendous progress that has been made in recent years using biologicals in cancer treatment The book summarizes an evolving science and a rapidly changing medical practice As we near the millennium it now becomes possible to envision a much more diversified system of cancer research and treatment that will afford greater opportunities for patients Some forms of cancer biotherapy use the strategy of tumour stabilization and control through continued biological therapy akin to

the use of insulin in the treatment of diabetes This textbook illustrates new methods of thinking and new strategies for control of cancer It is always difficult to move from past dogma to future opportunity but this third edition of Principles of Cancer Biotherapy illustrates why it is so important to the patients for researchers and clinicians to explore and apply these new opportunities in cancer biotherapy

Psychoneuroimmunology Robert Ader, 2014-06-28 Psychoneuroimmunology Second Edition presents reports on the relationship between the nervous and immune systems The book is divided into four sections The first section details the role of neural structures and neurotransmitter signals in communication with the immune system It documents the extensive neural connections with organs of the immune system the dynamics of noradrenergic sympathetic innervation of spleen and thymus and the evidence for immune signaling of the CNS Part II elaborates the role of hormones in the modulation of immune functions the basis for bidirectional communication between the neuroendocrine and immune systems and the potential physiological implications of these neuroendocrine immune system interactions The third part addresses behavioral influences on immune response the effects of conditioning stress and social interactions in modulating immune responses and the behavioral consequences of experimentally altered or genetically determined immunologic states The final section presents the effects of psychosocial factors on immune responses and the potential impact of behavioral interventions in modulating immunity in healthy human subjects and in patients with AIDS Neuroscientists endocrinologists and immunologists will find the book interesting

Tumor Immunology and Cancer Therapy R. H. Goldfarb, 2020-07-24 Based on a Tumor Immunology Symposium held in Pittsburgh this work provides comprehensive coverage of the most important aspects of tumor immunology It reveals novel approaches to the immunotherapy of cancer and presents complex issues in an accessible manner
