Evidence-Based Otolaryngology Jennifer Shin, Christopher Hartnick, Gregory Randolph, 2009-12-29 Recognizing the clinician's need for quick access to a comprehensive and immediately useful presentation of evidence based material the authors and editors have condensed the research on the most common otorhinolaryngological complaints into this indispensable volume Their unique approach color codes the level of research backing each set of evidence in order to make assessment of the evidence as quick and useful as

possible Each clinical problem is presented with a color key letting the physician know the level of evidence available green high level evidence yellow low to moderate levels of evidence or red major disagreement or only minimal low level evidence The content of each chapter is structured in the same manner so the reader quickly becomes accustomed to finding precisely the information needed for each new case Featuring sections on general otolaryngology head and neck surgery pediatrics and otology Evidence Based Otolaryngology not only presents the research but gives the clinician immediately applicable recommendations for patient treatment Advances in Obesity Prevention, Treatment and Management: Lifecycle and Complex System Approaches Mikiko Watanabe,2023-10-05 **Evidence-Based Clinical Practice in Otolaryngology** Luke Rudmik,2018-01-20 Get a quick expert overview of the many key facets of today s otolaryngology practice with this concise practical resource Dr Luke Rudmik and a leading team of experts in the field address high interest clinical topics in this fast changing field Presents an evidence based clinical approach to leading topics in otolaryngology Covers key topics such as management of vertigo management of adult sensorineural hearing loss reflux in sinusitis balloon catheter dilation in rhinology epistaxis functional rhinoplasty sublingual immunotherapy for allergic rhinitis pediatric obstructive sleep apnea pediatric tonsillectomy evaluation and management of unilateral vocal fold paralysis management of hoarseness endoscopic skull base resection for malignancy management of glottic cancer management of well differentiated thyroid cancer and management of the clinical node negative neck in early stage oral cavity squamous cell carcinoma Consolidates today s available information and experience in this challenging area into one convenient resource **Complications in Neurosurgery E-Book** Anil Nanda,2018-09-12 Learn from key leaders in the field of neurosurgery with the practical guidance presented in this first of its kind resource Complications in Neurosurgery uses a case based format to explore complications across the full range of commonly performed neurosurgical procedures As you review dozens of up to date real life cases you ll become better equipped to identify pitfalls ahead of time and have the knowledge to handle difficult situations that arise during surgery Presents commonly encountered cases provided by experienced neurosurgeons in all areas of this challenging specialty Includes high quality photographs images and dynamic video to ensure complete visual understanding of the procedures Uses a consistent easy to read format throughout covering a wide range of surgeries including general neurosurgery and cranial complications as well as spinal and peripheral complications Numerous videos depict possible complications for each type of surgery for example Complications of Cerebral Bypass Surgery includes videos showing how to obtain venous hemostasis without risking injury to the STA how to manage atheroma within the donor vessel and how to manage intraoperative occlusion of the bypass *Investigations into the Potential Benefits of Artificial Intelligence and Deep Learning to Surgical Oncologists* Marco Scarpa,Hani J. Marcus,Simon Williams,2023-08-11 Computational power has risen exponentially in recent decades providing new opportunities in many fields including that of surgical oncology One branch of information technology permeating many aspects of healthcare is artificial intelligence AI

and the incorporation of deep learning neural networks into clinical care AI enables the computational analysis of vast amounts of data and the learned ability to contextualize this information digitally through sophisticated algorithms opening a number of opportunities in the clinical setting This Research Topic aims to bring together the latest research in the field to demonstrate how these tools can be of benefit to surgical oncologists and patients alike Oncological surgeons are tasked with making difficult clinical decisions simultaneously weighing up patient data with expected outcomes whilst keeping in mind the risks of subsequent morbidity and mortality Incorporating deep learning algorithms in this field would enable mass clinical biochemical and radiological data analysis with numerous potential benefits Current algorithms have been shown to be efficacious and efficient in making prognostic predictions and making post surgical outcome assessments using data from various sources This Research Topic invites manuscript submissions which demonstrate utilizations of AI as a tool to support surgical oncologists through their advanced data analysis capabilities Manuscript submissions which showcase new opportunities for the incorporation of these systems into surgical practice are welcome as well as how AI can support clinical decision making and be used in the training of new oncological surgeons
