Reconstituting The Body Politic:

Reconstituting the Body Politic Jonathan M. Hess, 1999 The concept that art must have no instrumental function is a doctrine traditionally traced back to Kant's Critique of Judgment In Reconstituting the Body Politic Jonathan Hess proposes that this concept of autonomous art marks not a withdrawal from the political realm but the ultimate embodiment of Enlightenment political culture a response to a crisis in the institution idealized by Jurgen Habermas as the bourgeois public sphere In Reconstituting the Body Politic Hess explores the moment in late eighteenth century Germany that witnessed the emergence of two concepts that marked the modern era the political concept of the public sphere and the doctrine of aesthetic autonomy By considering the extent to which at its very inception the concept of aesthetic autonomy is inextricably intertwined with the emergence of the concept of the public sphere he offers both a historical study of the political conditions that produced this concept and a contribution to contemporary literary and political theory Reading texts by Kant alongside the writings of contemporaries like Karl Philipp Moritz Hess examines a wide variety of eighteenth century texts discourses and institutions He then enters into a critical dialogue with Walter Benjamin Reinhart Koselleck and Jurgen Habermas to articulate a political critique of this aesthetic The aesthetic theory of Kant's Critique emerges not as a mere defense of the disinterestedness of aesthetic pleasure but as an engaged response to the political limitations of public culture during the Enlightenment Hess argues for an understanding of these concepts as functionally interdependent and he reflects on what this interdependence might mean for the practice of literary and cultural criticism today His work will interest not only Germanists and critical theorists but also art historians and historians of philosophy and political thought

Healing the Body Politic Sandra C. Smith-Nonini, 2010 Healing the Body Politic examines the contested place of health and development in El Salvador over the last two decades It recounts the dramatic story of radical health activism from its origins in liberation theology and guerrilla medicine during the third world country's twelve year civil war through development of a remarkable popular health system administered by lay providers in a former war zone controlled by leftist rebels The ethnography contributes to the integration of medical and political anthropology by bringing the semiotics of health and the body to bear on cultural understandings of warfare the state and globalization

Pestilence and the Body Politic in Latin Literature Hunter H. Gardner, 2019-07-11 Scientists journalists novelists and filmmakers continue to generate narratives of contagion stories shaped by a tradition of disease discourse that extends to early Greco Roman literature Lucretius Vergil and Ovid developed important conventions of the western plague narrative as a response to the breakdown of the Roman res publica in the mid first century CE and the reconstitution of stabilized government under the Augustan Principate 31 BCE 14 CE relying on the metaphoric relationship

between the human body and the body politic these authors used largely fictive representations of epidemic disease to address the collapse of the social order and suggest remedies for its recovery Theorists such as Susan Sontag and Ren Girard have observed how the rhetoric of disease frequently signals social psychological or political pathologies but their observations have rarely been applied to Latin literary practices *Pestilence and the Body Politic in Latin Literature* explores how the origins and spread of outbreaks described by Roman writers enact a drama in which the concerns of the individual must be weighed against those of the collective staged in an environment signalling both reversion to a pre historic Golden Age and the devastation characteristic of a post apocalyptic landscape Such innovations in Latin literature have impacted representations as diverse as Carlo Cippola's paintings of a seventeenth century outbreak of bubonic plague in Naples and Margaret Atwood's *Maddaddam Trilogy* Understanding why Latin writers developed these tropes for articulating contagious disease and imbuing them with meaning for the collapse of the Roman body politic allows us to clarify what more recent disease discourses mean both for their creators and for the populations they afflict in contemporary media Race J.

Kameron Carter,2008-08-28 J Kameron Carter argues that black theology's intellectual impoverishment in the Church and the academy is the result of its theologically shaky presuppositions which are based largely on liberal Protestant convictions and he critiques the work of such noted scholars as Albert Raboteau Charles Long and James Cone **Political**

Self-Sacrifice K. M. Fierke,2012-11-29 Over the last decade the increasing phenomenon of suicide terrorism has raised questions about how it might be rational for individuals to engage in such acts This book examines a range of different forms of political self sacrifice including hunger strikes self burning and non violent martyrdom all of which have taken place in resistance to foreign interference Karin Fierke sets out to study the strategic and emotional dynamics that arise from the image of the suffering body including political contestation surrounding the identification of the victim as a terrorist or martyr the meaning of the death as suicide or martyrdom and the extent to which this contributes to the reconstruction of community identity *Political Self Sacrifice* offers a counterpoint to rationalist accounts of international terrorism in terrorist and security studies and is a novel contribution to the growing literature on the role of emotion and trauma in international politics

Political Aesthetics Karl Axelsson, 2019-08-22 Providing a gateway to a new history of modern aesthetics this book challenges conventional views of how art s significance developed in society The 18th century is often said to have involved a radical transformation in the concept of art from the understanding that it has a practical purpose to the modern belief that it is intrinsically valuable By exploring the ground between these notions of art s function Karl Axelsson reveals how scholars of culture made taste morals and a politically stable society integral to their claims about the experience of nature and art Focusing on writings by two of the most prolific men of letters in the 18th century Joseph Addison 1672 1719 and the third Earl of Shaftesbury 1671 1713 Axelsson contests the conviction that modern aesthetic autonomy reoriented the criticism and philosophy originally prompted by these two key figures in the history of aesthetics By re examining the political relevance of Addison and Shaftesbury s theories of taste Axelsson shows that first and foremost they sought to fortify a natural link between aesthetic experience and modern political society

Artifactual Elizabeth Anne Davis, 2023-07-14 In *Artifactual* Elizabeth Anne Davis explores how Cypriot researchers scientists activists and artists process and reckon with civil and state violence that led to the enduring division of the island using forensic and documentary materials to retell and recontextualize conflicts between and within the Greek Cypriot and Turkish Cypriot communities Davis follows forensic archaeologists and anthropologists who attempt to locate identify and return to relatives the remains of Cypriots killed in those conflicts She turns to filmmakers who use archival photographs and footage to come to terms with political violence and its legacies In both forensic science and documentary filmmaking the dynamics of secrecy and revelation shape how material remains such as bones and archival images are given meaning Throughout Davis demonstrates how Cypriots navigate the tension between an ethics of knowledge which valorizes truth as a prerequisite for recovery and reconciliation and the politics of knowledge which renders evidence as irremediably partial and perpetually falsifiable

Dismembering the Body Politic Paul D. Halliday, 2003-11-13 This is a major survey of how towns were governed in late Stuart and early Hanoverian England A new kind of politics emerged out of England s Civil War partisan politics This happened first in the corporations governing the towns and not at Parliament as is usually argued Based on an

examination of the records of scores of corporations this book explains how war unleashed a cycle of purge and counter purge which continued for decades It also explains how a society that feared a system of politics based on division found the means to absorb it peacefully As conflict sharpened in communities everywhere local competitors turned to the court of King s Bench to resolve their differences In doing so they prompted the court to develop a new body of law that protected local governments from the divisive impulses within them **Germans, Jews and the Claims of Modernity** Jonathan M.

Reconstitution of American Democracy J. Peter Euben,John R. Wallach,Josiah Ober,2018-07-05 In the contemporary United States the image and experience of Athenian democracy has been appropriated to justify a profoundly conservative political and educational agenda Such is the conviction expressed in this provocative book which is certain to arouse widespread comment and discussion What does it mean to be a citizen in a democracy Indeed how do we educate for democracy These questions are addressed here by thirteen historians classicists and political theorists who critically examine ancient Greek history and institutions texts and ideas in light of today s political practices and values They do not idealize ancient Greek democracy Rather they use it with all its faults as a basis for measuring the strengths and shortcomings of American democracy In the hands of the authors ancient Greek sources become partners in an educational dialogue about democracy s past one that goads us to think about the limitations of democracy s present and to imagine enriched possibilities for its future The authors are diverse in their opinions and in their political and moral commitments But they share the view that insulating American democracy from radical criticism encourages a dangerous complacency that Athenian political thought can disrupt **Wounded Cities** Jane Schneider,Ida Susser,2020-06-29 Although the seemingly

apocalyptic scale of the World Trade Center disaster continues to haunt people across the globe it is only the most recent example of a city tragically wounded Cities are in fact perpetually caught up in cycles of degeneration and renewal As with the WTC from time to time these cycles are severely ruptured by a sudden unpredictable event In the wake of recent terrorist activities this timely book explores how urban populations are affected by wounds inflicted through violence civil wars overbuilding drug trafficking and the collapse of infrastructures as well as natural disasters such as earthquakes Mexico City

New York Beirut Belfast Bangkok and Baghdad are just a few examples of cities riddled with problems that undermine on a daily basis the quality of urban life What does it mean for urban dwellers when the infrastructure of a city collapses transport communication grids heat light roads water and sanitation What are the effects of foreign investment and huge construction projects on urban populations and how does this change the look and character of a city How does drug trafficking intersect with class race and gender and what impact does it have on vulnerable urban communities How do political corruption and mafia networks distort the built environment Drawing on in depth case studies from across the globe this book answers these intriguing questions through its rigorous consideration of changing global and national contexts social movements and corrosive urban events Adopting a grass roots up approach it places emphasis on peoples experiences of uneven development and inequality their engagement with memory in the face of continual change and the relevance of political activism to bettering their lives It is especially attentive to the historical interaction of particular cities with wider political and economic forces as these interactions have shaped local governance over time

Postcommunism and the Body Politic Ellen E. Berry, 1995-07 The epidemic of mass rape in the former Yugoslavia has illustrated once again and in particularly brutal fashion the inextricable relationship between national politics sexual politics and body politics The nexus of these three forces is highly charged in any culture at any time in history but especially so among cultures in which rapid even cataclysmic changes in material realities and national self conceptions are eroding or overwhelming previously secure boundaries The postcommunist moment in the so called Second World Central and Eastern Europe and the former Soviet Union has dramatically exposed the opportunities and dangers that arise when the political cultural and economic foundations of a society are de and then re structured Gender roles and relations expressions of sexuality or attempts to recontain them representations of the body especially the female body and the larger cultural meanings it assumes are particularly marked sites to witness the performance of complex national dramas of crisis and change This groundbreaking volume turns its attention to the Second World specifically to such subjects as the birth of the sex media and porn industry in Russia Russian women and alcoholism cinema in post communist Hungary patriotism and gender in Poland sexual dissidence in Eastern Europe and women in the former Yugoslavia go to the Genders website

If the Body Politic Could Breathe in the Age of the Refugee Julia Metzger-Traber, 2018-05-15 This book posits that the refugee crisis may actually be a crisis of identity in a rapidly changing world It argues that Western conceptions of the individual Self shape metaphors of political homes and thus the geopolitics of belonging and exclusion Metzger Traber creatively re conceives political belonging by perceiving the interconnection of each Self through its most immediate home the breathing body On an experimental literary journey through her own past and that of Germany she puts political philosophy in conversation with somatic and spiritual insight to expand notions of Self and Home Then she asks What ethical imperatives arise What kinds of homes and homelands would we create if we no longer thought we ended at our skin
