Modern Science and the Capriciousness of Nature K. Rogers,2006-10-10 This book questions the way that modern science and technology are considered able to liberate society from the erratic forces of nature Modern science is implicated in a gamble on a technological society that will replace the natural world with a better one The author questions the rationality of this gamble and its implications for our lives

Miracles : 2 Volumes Craig S. Keener,2011-11-01 Christianity Today 2013 Book Award Winner Winner of The Foundation for Pentecostal Scholarship s 2012 Award of Excellence 2011 Book of the Year Christianbook com s Academic Blog Most modern prejudice against biblical miracle reports depends on David Hume s argument that uniform human experience precluded miracles Yet current research shows that human experience is far from uniform In fact hundreds of millions of people today claim to have

experienced miracles New Testament scholar Craig Keener argues that it is time to rethink Hume's argument in light of the contemporary evidence available to us This wide ranging and meticulously researched two volume study presents the most thorough current defense of the credibility of the miracle reports in the Gospels and Acts Drawing on claims from a range of global cultures and taking a multidisciplinary approach to the topic Keener suggests that many miracle accounts throughout history and from contemporary times are best explained as genuine divine acts lending credence to the biblical miracle reports

Describing the Hand of God Robert Brennan, 2016-04-28 The question of divine agency in the world remains one important unresolved underlying obstacle in the dialogue between theology and science Modern notions of divine agency are shown to have developed out of the interaction of three factors in early modernity Two are well known late medieval perfect being theology and the early modern application of the notion of the two books of God's revelation to the understanding of the natural order It is argued the third is the early modern appropriation of the Augustinian doctrine of inspiration This assumes the soul's existence and a particular description of divine agency in humans which became more generally applied to divine agency in nature Whereas Newton explicitly draws the parallel between divine agency in humans and that in nature Darwin rejects its supposed perfection and Huxley raises serious questions regarding the traditional understanding of the soul This book offers an alternative incarnational description of divine agency freeing consideration of divine agency from being dependent on resolving the complex issues of perfect being theology and the existence of the soul In conversation with Barth's

pneumatology this proposal is shown to remain theologically coherent and plausible while resolving or avoiding a range of known difficulties in the science theology dialogue

The Cambridge History of Reformation Era Theology Kenneth G Appold, Nelson Minnich, 2023-10-12 The Cambridge History of Reformation Era Theology explores the key developments in both Protestant and Catholic theology ca 1475-1650 Exploring the various settings and schools in which theology was formulated and taught and the social backgrounds of its exponents including women and non university trained men as well as writers both in and outside Europe it establishes how the major denominations took their positions and participated in a broader discourse The volume examines specific theological themes from different denominational perspectives

demonstrating how theology affected the lives of believers via pastoral theology canon law and spirituality and how theological ideas were linked to politics warfare science and the arts Written by an international team of leading scholars in the field this History expands the range of theological discourse by introducing new topics and spokespersons as well as global and ecumenical perspectives It will remain the definitive place to begin any further study of theology during this period for years to come *A Modern Relation of Theology and Science Assisted by Emergence and Kenosis* Bradford McCall,2018-02-28 How should we attempt to understand the relationship between theology and science in the twenty first century In this book I will attempt to answer this question by examining several previous attempts to classify this relationship I also develop my personal view of the relation thereafter discussing some Catholic contributions to this project and then revisit some of my previously published material highlighting the role of panentheism therein and noting an emergent implication from the literature the resultant possibilities for God an implication that creates space for a broadly relational perspective of the process of emergence These movements allow me to argue that kenosis and emergence can add to the discussion of understanding the theology and science relationship Herein I advocate a monistic process based view of the overlapping relationship between theology and science **Nature and the Godly Empire** Sujit Sivasundaram,2005-11-17 A study of the relations between nineteenth century science and Christianity
