Theoretical Issues in Psychology John R. Morss, Niamh Stephenson, Hans van Rappard, 2013-06-29

Theoretical Issues in Psychology is published as the discipline of psychology enters its at least third century. The year 2001 brings with it millennial reflections as well as the strange sense of déjà vu that we derive from the Kubrick movie *As to the former*. A glance at the contents list of this volume will demonstrate both the maturity and the vigour of theoretical debate within psychology. There is a level of sophistication here that should be the cause of quiet celebration. Recent ideas about discursive practice and subjectivity, chaos theory and autopoiesis are effortlessly entrained with classical issues. Canonical texts are looked at with fresh eyes. Unresolved social and political questions are doggedly persisted with and new perspectives on the human experience are pioneered. We are not afraid of long words even if French in origin but nor are we afraid to recognise that we are physical beings who touch other beings who hold desire and remember and who talk talk talk. For surely it is theoretically sensitive work in psychology whether critical or not that best represents what the discipline has to offer the wider community.

Introduction to Gender Jennifer Marchbank, Gayle Letherby, 2014-06-30

Thoroughly updated in this second edition, *Introduction to Gender* offers an interdisciplinary approach to the main themes and debates in gender studies. This comprehensive and contemporary text explores the idea of gender from the perspectives of history, sociology, social policy, anthropology, psychology, politics, pedagogy and geography and considers issues such as health and illness, work, family, crime and violence and culture and media. Throughout the text, studies on masculinity are highlighted alongside essential feminist work, producing an integrated investigation of the field. Key features: A thematic structure provides a clear exploration of each debate without losing sight of the interconnections between disciplines. World in focus boxes and international case studies offer a broad global perspective on gender studies. In-text features and student exercises including Controversy, A critical look and Stop and think boxes allow the reader to engage in the debates and revise the material covered. Hotlinks throughout the text make connections between chapters, allowing the reader to follow the path of particular issues and debates between topics and disciplines. New to the second edition: A new chapter explores gender through the discipline of philosophy. A new section on international relations brings this relevant topic into focus. Current discussion on the language of gender across Europe is brought in to Chapter 1. A focus on Europe and Scandinavia as well as the UK gives the text a broader scope. Examples are updated throughout to ensure the text is cutting edge and relevant. *Introduction to Gender* second edition is highly relevant to today's students across the social sciences and is an essential introduction for students of sociology, women's studies and men's studies.

Marketing and Social Construction Chris Hackley, 2003-08-29 Marketing is at the centre of the business education boom a million or more people worldwide are studying the subject at any one time Yet despite widespread discontent with the intellectual standards in marketing very little has changed over the past thirty years In this ground breaking new work Chris Hackley presents a social constructionist critique of popular approaches to teaching theorising and writing about marketing

Drawing on a wide range of up to date European and North American studies Dr Hackley presents his argument on two levels First he argues that mainstream marketing s ideologically driven curriculum and research programmes dominated by North American tradition reproduce business school myths about the nature of practically relevant theory and the role of professional education in management fields Second he suggests a broadened theoretical scope and renewed critical agenda for research theory and teaching in marketing Intellectually rigorous yet comprehensible this work will be of vital importance to all those interested in the future of teaching and research in business and management **Social Thinking and History**
