Gender and Violence in the Middle East David Ghanim Ph.D.,2009-03-20 Gender and Violence in the Middle East argues that violence is fundamental to the functioning of the patriarchal gender structure that governs daily life in Middle Eastern societies Ghanim contends that the inherent violence of gender relations in the Middle East feeds the authoritarianism and political violence that plague public life in the region In this societal sense men as well as women may be said to be victims of the structural violence inherent in Middle Eastern gender relations The author shows that the varieties of physical violence against women for which the Middle East is notorious honor killings obligatory beatings female genital mutilation are merely eruptions of an ethos of psychological violence and the threat of physical violence that pervades gender relations in the Middle East Ghanim documents and analyzes the complementary roles of both sexes in sustaining the system of violence and oppressive control that regulates gender relations in Middle Eastern societies He reveals that women are not only victims of violence but welcome the opportunity to become perpetrators of violence in the married female life cycle of subordination followed by domination The mother in law plays a crucial role in supporting the structure of patriarchal control by stoking tensions with her daughter in law and provoking her son to commit sanctioned violence on his wife The author applies his deep analysis of gender and violence in the Middle East to illuminate the motivational profiles of male and female political suicidalists from the Middle East and the martyrological adulation that they are accorded in Middle Eastern societies

Gender and the Making of Modern Medicine in Colonial Egypt Hibba Abugideiri,2016-04-15 Gender and the Making of Modern Medicine in Colonial Egypt investigates the use of medicine as a tool of empire to serve the state building process in Egypt by the British colonial administration It argues that the colonial state effectively transformed Egyptian medical practice and medical knowledge in ways that were decidedly gendered On the one hand women medical professionals who had once trained as doctresses hakimas were now restricted in their medical training and therefore saw their social status decline despite colonial modernity s promise of progress On the other hand the introduction of colonial medicine gendered Egyptian medicine in ways that privileged men and masculinity Far from being totalized colonial subjects Egyptian doctors paradoxically reappropriated aspects of Victorian science to forge an anticolonial nationalist discourse premised on the Egyptian woman as mother of the nation By relegating Egyptian women whether as midwives or housewives to maternal roles in the home colonial medicine was determinative in diminishing what control women formerly exercised over their profession homes and bodies through its medical dictates to care for others By interrogating how colonial medicine was constituted Hibba Abugideiri reveals how the rise of the modern state configured

the social formation of native elites in ways directly tied to the formation of modern gender identities and gender inequalities in colonial Egypt

increasingly turned to the country's authentic leaders to maintain control while continuing to marginalize women Efrati considers Iraqi women's efforts to preserve the progress they have made utterly defeating the notion that they have been passive witnesses to history

The Human Rights Covenants at 50 Daniel Moeckli,Helen Keller,Corina Heri,2018-06-06 Half a century ago on 16 December 1966 the UN General Assembly adopted the International Covenant on Civil and Political Rights ICCPR and the International Covenant on Economic Social and Cultural Rights ICESCR While the adoption of the two UN human rights covenants was celebrated all over the world their 50th anniversary has received very little attention from the international community The present book marks this anniversary by taking stock of the first half century of the existence of what are probably the world s two most important human rights treaties It does so by reflecting on what the covenants have achieved or failed to achieve in the years that have passed by determining and comparing their current influence in the various regions of the world and by assessing their potential roles in the future The book contains papers that were presented during a symposium held in Zurich in 2016 which brought together experts and stakeholders from a range of disciplines and world regions Some fundamental issues that are addressed by the contributors are as old as the two covenants themselves They concern for example the division of human rights into first and second generation rights and the question of whether there should be one central monitoring body possibly a world court or more than just one However the contributors go beyond such questions that have been explored before they develop new answers to old questions and point to new challenges
