Restructuring Schools, Reconstructing Teachers Peter Woods, Bob Jeffrey, Geoff Troman, Mari Boyle, 2019-07-01 Drawing on wide ranging research this book originally published in 1997 explores how the policy changes of previous years were affecting primary teachers and their work at the time Within the context of worldwide restructuring the thoughts feelings and activities of teachers in their daily work are examined The core argument is that what used to be a complex but fulfilling job distinguished by professional dilemmas which are amenable to professional skill had become increasingly marked by tension and constraint which frustrates teacher creativity While some teachers found new opportunities in the new primary school many used strategical and micro political activity in order to cope while others fell victim to stress and burnout The authors argue that teachers own active involvement in policy change is required if their creative potential is to be realized The book will still be of interest to teachers in primary schools researchers and policy makers

Reconstructing the Work of Teacher Educators Theresa Bourke, Deborah Henderson, Rebecca

Spooner-Lane, Simone White, 2022-08-30 This book examines agentic approaches by which teacher educators navigate a highly regulated environment It investigates how teacher educators are responding to such regulation by employing approaches such as exploratory and case study research designs This book analyzes qualitative and quantitative data to understand the diverse innovative and critical perspectives of teacher educators who are guided by state and federal level initiatives to enhance the quality Initial Teacher Education ITE programs Prominent educational theoretical perspectives are also used in this book to inform data analysis and to illuminate the empirically based findings This book showcases research informed insights for the global education community from leading researchers from across a number of teacher education institutions locally and otherwise By adopting an activist approach this book positions teacher educators research and contribution to the field as agentic and pro active *Reconstructing Teaching* Ian Hextall, Pat Mahony, 2013-04-15 One of the greatest resources a school has is its staff How teachers themselves and their work are defined are therefore matters of utmost importance Major trends of increased control and new managerialism are occurring in most OECD countries radically altering both the content and form of teacher education This book outlines recent changes in teacher education and professional development and by drawing on recent research findings explores the positive and negative impacts on the nature of teaching and the shape of the profession *Teacher Education Policy* Rob McBride, 2003-12-16 To improve schools we need to improve teachers This volume provides recent research evidence that suggests that current education policy is not Promoting Effective Teacher Education And That Teacher Education Policy has failed to support the formation of professional partnerships in initial teacher education has almost ignored the induction of newly qualified teachers and has narrowed in service education into support for the implementation of central policy The evidence gathered in this book is used to argue for new forms of teacher education in every phase built upon the foundation of professional partnership between schools and institutions of higher education It is suggested that the funding for such changes could be drawn from less effective forms of school improvement such as National Curriculum development and school inspection With the implementation of such changes it is argued good quality teacher education programmes would prosper and foster a broad consensus about educational development that is often absent *A Plan for the Reconstruction of Teacher Education in Iraq ...* Abdul Hamid Kadhim, 1947 **Changing Times In Teacher Education** Marvin F. Wideen, Peter P. Grimmett, 2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of

teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of its purposes and processes

Teacher Education and Pedagogy Michael Evans, 2013 Summary Initial teacher education continues to elicit strong views and contested prescriptions with judgements made increasingly on the basis of international comparisons Against this background of educational debate and polemic there is a need for insights gained from research based qualitative accounts of the processes and practice taking place in high performing institutions and contexts Teacher Education and Pedagogy combines critical discussion of transformative processes of teacher education policy and planning with fine grained analysis of effective practice Book cover Policy and Politics in Teacher Education John Furlong, Marilyn Cochran-Smith, Marie Brennan, 2013-09-13 During the last 20 years governments around the world have paid increasing attention to the recruitment preparation and retention of teachers Teacher supply and teacher quality have become significant policy issues taken up by policy makers at the highest levels This is because teachers are now seen by many governments as the lynch pin of educational economic and social reform This volume grew out of a recognition by the Editors of the growing significance of teacher education policy and a curiosity about international trends and differences The book brings together nine papers from leading academics around the world from the UK England and Scotland the USA Australia Singapore and Belgium plus a joint paper comparing Namibia and the USA Taken together the papers reveal the complexities and contradictions of international trends On the one hand they demonstrate that there is indeed a common direction of travel along the lines encouraged by international bodies such as the OECD At the same time however the papers also reveal important differences among countries in terms of how they are addressing common aspirations as well as some apparent contradictions within the policies of individual nations This book was based on the special issue of Teachers and Teaching *Democratic Teacher Education Reforms In Namibia* Ken Zeichner, 2019-06-03 An analysis of teacher education reforms in Namibia in the post independence era from the perspective of government personnel teacher educators and teachers themselves This book examines post independence teacher education reforms in the southern African country of Namibia from the perspective of various actors in the reform process Ministry Reflection, Change, and Reconstruction in the Context of Educational Reform and Innovation in China Yuhong Jiang, 2013-01-16 This book delivers a state of the art survey of the issues and approaches in contemporary English as a foreign language EFL teacher education It examines the professional development of the teachers who taught English as a foreign language and engaged in a teacher preparation programme of reflective teaching at a university in China Situated in the context of the reforms of English language teaching and teacher education this book focuses on the theme of how if at all reflective teaching contributes to Chinese university EFL teachers development in thinking about English language teaching and in their own classroom practice To date the study of English as a foreign language teacher education and professional development mainly focused on the teaching skills and pedagogical
