development Jameson entreated historical societies and professional scholars to decide for themselves the historical research that needed to be done and to seek support accordingly instead of simply doing whatever work wealthy patrons were willing to subsidize Similarly he told colleges and universities to give scholars the freedom to engage in research without being hamstrung by the predilections of trustees And finally he admonished the federal government to fulfill its responsibility to protect and publish historically significant documents As a young scholar notes Morey Rothberg in his introduction Jameson was trapped between his desire to explore the social aspects of American political history and his conservative political instincts which appeared to frustrate that ambition Consequently he established a career as an institution builder rather than as a writer of historical narrative He ultimately provided the American historical profession a national structure within which the distinctive elements of race ethnicity class and culture could be investigated by others since he could not bring himself to attempt this task The two future volumes in this project will bring together Jameson s correspondence and other documents that detail Jameson s strategies for encouraging the growth of professional scholarship The completed project promises a wealth of rich insights into the significance of humanistic research and education in contemporary society a tool not only for historians but also for cultural administrators journalists and those involved in politics and government
