on a category of the future as a temporal mode that breaks with the present In this volume distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in Greek historiography from Herodotus to Appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity They look both at contemporary scholarly argument and the writings of Greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion By reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time *Organizational Resource Management* Jussi Kantola, 2015-11-05 The management of
