Ball Lightning Mark Stenhoff, 2005-12-16 Down comes a deluge of sonorous hail Or prone descending rain Wide rent the clouds Pour a whole flood and yet its flame unquenched Th unconquerable lightning struggles through Ragged and fierce or in red whirling balls And fires the mountains with redoubled rage Black from the stroke above the smould ring pine Stands a sad shattered trunk and stretched below A lifeless group the blasted cattle lie James Thompson The Seasons 1727 have been investigating ball lightning for more than two decades I published a ball lightning report in Nature in 1976 that received worldwide publicity and I consequently many people wrote to me with accounts of their own experiences Within a very short time I had accumulated about 200 firsthand accounts and the file has continued to grow steadily since then Several things impressed

me Few of those who wrote to me had any detailed foreknowledge of ball lightning at the time of their observation Nonetheless once reports of other phenomena such as St Elmo s fire had been eliminated the remaining descriptions were remarkably consistent Furthermore nearly all who contacted me were keen to have an explanation of what they had seen and seemed entirely sincere
