An outstanding volume which includes both conceptual and empirical chapters from distinguished academics and practitioners from several countries. This is essential reading for all those interested in health and well being in the workplace and the establishment of satisfactory home and work life balances. The editor should be congratulated for this groundbreaking book. Marilyn J Davidson, University of Manchester, UK. This book is overdue. Someone somewhere a long time ago should have put this book together because its value is incalculable. If anything, this book is more a handbook than a research companion on all those aspects of the workplace that touch on or represent change: pace, workload, work addiction, work life balance, job satisfaction, job involvement, stress, conflict, values, Type A behaviour and other personality disorders. What's more, it delves into some of the more unknown elements of these aspects of work in different countries. Read it. You'll not be disappointed. Janice Langan Fox, Swinburne University of Technology, Melbourne, Australia. This is a timely and needed book for all professionals who have concerns about issues related to quality of life and well being. This book is an original piece prepared by a team of international experts written in an informative and scholarly manner and presents in an effective form the accumulated wealth of knowledge on the theme. This is a solid book that can satisfy both the academic readership and the professional community. I truly and sincerely recommend it. It is a must for people who are interested in this subject. Simon Dolan, ESADE Business School, Spain. This Research Companion examines the effects of work hours on individual and family well being and questions why people work hard and whether some can work too hard. It integrates contributions from two areas of research: work hours and work addiction that have historically been pursued separately. Ronald Burke argues that while work hours have decreased
