1.0 What is the Sport and Recreation Planning Program

Sport and Recreation Services seeks to implement better planning and prioritisation of sport and recreation infrastructure across Queensland.

The Sport and Recreation Planning Program (the program) will provide organisations with funding to develop quality infrastructure planning documents. These will contribute to the evidence base regarding future infrastructure needs for sport and recreation in Queensland.

2.0 Consistent Data

The data collected through the program will be incorporated into a single database managed by Sport and Recreation Services. Consistent data is the key to ensuring the database contains high quality data suitable for planning purposes.

3.0 Data Model

The geographic information systems (GIS) team at Sport and Recreation Services has developed a data model for collecting consistent venue and participation information. The model is suitable for organized sports that are played on surfaces such as fields and courts e.g. rugby league and tennis. The data model was designed to collect quality data using a consistent approach. Data from the model can be mapped in a GIS and analysed for planning purposes.

4.0 Using the data model

Data collection can be facilitated using the data model in a spreadsheet in Microsoft Excel. If you would like to use this option please contact the Sport and Recreation Services GIS team for help tailoring the spreadsheet for your needs (see next page for contact details).
