The sky is a vast immovable dial plate of that clock whose pendulum ticks ages instead of seconds and whose time is eternity The moon moves among the illuminated figures traversing the dial guickly like a second hand once a month The sun like a minute hand goes over the dial once a year Various planets stand for hour hands moving over the dial in various periods reaching up to one hundred and sixty four years while the earth like a ship of exploration sails the infinite azure bearing the observers to different points where they may investigate the infinite problems of this mighty machinery.
