## **Red Card:**

Red Card Tony Kelly, 2013-10-15 Tony Kelly was football crazy from the age of seven. At sixteen he was the youngest ever player in the first team at Bristol City and in his twenties he became a pro playing for clubs such as Stoke City and Cardiff City in the Football League second and third divisions. But his blossoming soccer career was marred by a series of mishaps and misdeeds which drove him to disaster. Ruined by an addiction to gambling, he lost his job, his career, his partner, and all his money. Now he has written his story as Kelly puts it to invite the public, my family, and my friends into my secret hell of racism, despair, depression, stardom, gambling addiction, and ultimately self-destruction. **Red Card** is a tragic yet uplifting story of a sportsman's battle with his demons on and off the pitch.

**Red Card** Carrie Aarons, 2016-02-14 She spent five years planning a future that will never exist. He spent five years trying to erase a past he can't forget. London is Leah Watson's fresh start. When she secures the perfect internship during her study abroad semester with an infamous celebrity public relations firm, she is determined to forge her own path, one that is nothing like her life back in Oklahoma. That plan is tested when British football's bad boy Killian Ramsey decides that she's the one he wants, and he's playing for keeps. Will she put her future on hold again for the type of man she swore she'd stay away from? Killian is one bloody good football player. After a tragedy shattered his entire world, the cocky and arrogant face he puts on for the media is a complete lie. When he meets Leah, his heart starts to beat for the first time in years. But when the feelings get too real, his perfectly constructed facade starts to slip. Will he risk it all to be with her, taking whatever penalties are thrown his way, or will he play it safe?

**Red Card** Bill Summers, 2018-10-05 Soccer phenom Charlie Connor is cruising through high school until he gets the letter. He makes the academy team at Burnchester United and makes fast enemies. Barrett,2003-01-09 Environmental problems like global climate change and stratospheric ozone depletion can only be remedied if states cooperate with one another But sovereign states usually care only about their own interests So states must somehow restructure the incentives to make cooperation pay This is what treaties are meant to do A few treaties such as the Montreal Protocol on Substances that Deplete the Ozone Layer succeed Most however fail to alter the state behaviour appreciably This book develops a theory that explains both the successes and the failures In particular the book explains when treaties are needed why some work better than others and how treaty design can be improved The best treaties strategically manipulate the incentives states have to exploit the environment and the theory developed in this book shows

how treaties can do this The theory integrates a number of disciplines including economics political science international law negotiation analysis and game theory It also offers a coherent and consistent approach The essential assumption is that treaties be self enforcing that is individually rational collectively rational and fair The book applies the theory to a number of environmental problems It provides information on more than three hundred treaties and analyses a number of case studies in detail These include depletion of the ozone layer whaling pollution of the Rhine acid rain over fishing pollution of the oceans and global climate change The essential lesson of the book is that treaties should not just tell countries what to do Treaties must make it in the interests of countries to behave differently That is they must restructure the underlying game Most importantly they must create incentives for states to participate in a treaty and for parties to comply **Logical**
