physics cutting across disciplines of quantum optics atomic and condensed matter physics Quantum coherence represents a universal property of the quantum systems that applies both to light and matter thereby tying together materials and phenomena Moreover the optical coherence can be transferred to the medium through the light matter interactions Since the early days of quantum mechanics there has been a desire to control dynamics of quantum systems The generation and control of quantum coherence in matter by optical means in particular represents a viable way to achieve this longstanding goal and semiconductor nanostructures are the most promising candidates for controllable quantum systems Optical generation and control of coherent light matter states in semiconductor quantum nanostructures is precisely the scope of the present book Recently there has been a great deal of interest in the subject of quantum coherence We are currently witnessing parallel growth of activities in different physical systems that are all built around the central concept of manipulation of quantum coherence The burgeoning activities in solid state systems and semiconductors in particular have been strongly driven by the unprecedented control of coherence that previously has been demonstrated in quantum optics of atoms and molecules and is now taking advantage of the remarkable advances in semiconductor fabrication technologies A recent impetus to exploit the coherent quantum phenomena comes from the emergence of the quantum information paradigm

sovereignty how should we respond to a Rwanda to a Srebrenica to gross and systematic violations of human rights that offend every precept of our common humanity Kofi Annan This question asked by Kofi Annan over twenty years ago has not lost its relevance since as for instance demonstrated by the paralysis of the Security Council in the face of the continued use of chemical weapons by the Syrian regime against its own population The present work addresses the question of whether the unilateral use of force by states for humanitarian purposes hence without a Security Council authorization could be justified via the concept of humanitarian countermeasures In this context humanitarian countermeasures are derived from the notion of countermeasures which stems from the law of state responsibility as conceived in Art 49 et seq DARS and traditionally only refers to peaceful bilateral measures The core of the study is to open up countermeasures to humanitarian military action discuss the legal feasibility of such an approach while effectively containing the potential for abuse by establishing a legal framework In a final step concrete conditions for humanitarian countermeasures are defined which can guide a reinterpretation of countermeasures and the further development of customary law About the author Cathrine Cr mer studied law at the Humboldt European Law School at the HU Berlin the Universit Paris II Panth on Assas Ma trise en Droit in Private International Law and at King s College London LL M in Transnational Law She obtained her doctorate at the LMU Munich where she worked as a research assistant and taught public international law Cathrine Cr mer is currently a legal trainee at the Permanent Mission of Germany to the United Nations in New York Richard A.
