bamboo influences distribution and conservation in Bhutan and Myanmar **The Journal of the Bombay Natural History Society** Bombay Natural History Society,2002 **Molecular Markers, Natural History and Evolution** J. C. Avise,1994

Molecular approaches have opened new windows on a host of ecological and evolutionary disciplines ranging from population genetics and behavioral ecology to conservation biology and systematics *Molecular Markers Natural History and Evolution* summarizes the multi faceted discoveries about organisms in nature that have stemmed from analyses of genetic markers provided by polymorphic proteins and DNAs The first part of the book introduces rationales for the use of molecular markers provides a history of molecular phylogenetics and describes a wide variety of laboratory methods and interpretative tools in the field The second and major portion of the book provides a cornucopia of biological applications for molecular markers organized along a scale from micro evolutionary topics such as forensics parentage kinship population structure and intra specific phylogeny to macro evolutionary themes including species relationships and the deeper phylogenetic structure in the tree of life Unlike most prior books in molecular evolution the focus is on organismal natural history and evolution with the macromolecules being the means rather than the ends of scientific inquiry Written as an intellectual stimulus for the advanced undergraduate graduate student or the practicing biologist desiring a wellspring of research ideas at the interface of molecular and organismal biology this book presents material in a manner that is both technically straightforward yet rich with concepts and with empirical examples from the world of nature *A Natural History of Raccoons* Dorcas MacClintock,2002 Originally published in 1981 this is a thorough study of the characteristics and habits of one of the most fascinating creatures among the country s wildlife It covers behavioral characteristics feeding habits controlling their population mating and habitat requirements The book includes a chapter on caring for orphaned raccoons *Animals Pets Raccoons* Samuel I. Zeveloff,2013-07-09 The word raccoon is drawn from the Native American Algonquian language Their term arakun roughly translates to he who scratches with his hands Anyone who has found a raccoon rummaging around in a once securely closed trash container can attest to how skillful raccoons are with their front paws In fact they have four times as many sensory receptors in their forepaw skin as they do in their hindpaws a ratio similar to that of human hands and feet Samuel Zeveloff explores this trait and much more in his accessible natural history of raccoons Written with the general reader in mind *Raccoons* presents detailed information on raccoon evolution physical characteristics social behavior habitats food habits reproduction and conservation as well as their relationship with humans and many other topics The section on distribution and subspecies focuses on the raccoon s current range expansion and the material on their cultural significance demonstrates this mammal s unique status in different North American cultures *Harmsworth Natural History* ,1910 *Raccoons and Their Relatives* David Stone,International Union for Conservation of Nature and Natural Resources. Species Survival Commission,1995 These booklets give the general reader facts and information about fur bearing mammals from a more conservation oriented perspective than information generally available from other sources

Each is based on the relevant SSC Action Plan and is well illustrated with color photographs and a center spread of sketches showing the animals in action

Ephemeral by Nature Stephen Lyn Bales, 2024-01-12 Reading **Ephemeral by Nature** is the next best thing to talking a walk with Stephen Lyn Bales In addition to describing the plants and animals readers will encounter Bales scouts out hidden side trails A look at jack in the pulpit will turn up dinosaurs Darwin and Finding Nemo and consideration of cerulean warblers will lead to coffee in Columbia and a discussion of why the sky is blue Each chapter begins with one of his delightful drawings and you'll find Bales' artistic eye is as discerning and detailed as his writing Patricia K Lichen author of *Passionate Slugs* and *Hollywood Frogs* and *Kidnapping the Wild One* In this captivating collection of twelve essays a testament to a lifetime's fascination with the outdoors and its myriad wonders naturalist Stephen Lyn Bales examines a variety of flora and fauna that in one way or another can be described as ephemeral that is fleeting short lived or transient Focusing on his native East Tennessee Bales introduces us to several oddities including the ghost plant a wispy vascular plant that resembles a rooster's tail and grows mainly in areas devoid of sunlight the Appalachian panda an ancestor of today's red panda that wandered the region millions of years ago and whose fossil remains have only recently been discovered and the freshwater jellyfish a tiny organism that is virtually invisible except for those hot summer days when clusters of them bloom into shimmering medusae sometimes by the thousands Other essays consider such topics as the plight of the monarch butterfly a gorgeous insect whose populations have dropped by 90 percent in only the last two decades the reintroduction of the lake sturgeon one of nature's most primitive and seldom seen fish into the waters of the Tennessee Valley and the surprising emergence of coyote wolf and coyote dog hybrids in the eastern states Written with insight humor and heart **Ephemeral by Nature** is as entertaining as it is instructive Along with a wealth of biological details and his own handsome pen and ink drawings Bales fills the book with delightful anecdotes of field trips species protection efforts and those thrilling occasions when some elusive member of the natural order shows itself to us if

only for a brief moment Stephen Lyn Bales senior naturalist at Ijams Nature Center in Knoxville is the author of *Natural Histories Stories from the Tennessee Valley* and *Ghost Birds Jim Tanner and the Quest for the Ivory billed Woodpecker* 1935 1941 both published by the University of Tennessee Press

Endangered Animals Brian Miller, Richard P. Reading, 2000-09-30 Explore the multiple issues that surround species declines and conservation efforts through the only reference source to examine the conflicting conservation issues of 49 endangered species While the causes of endangerment are relatively easy to understand the ultimate or underlying factors are often far more complex and difficult to address An introduction to these issues and how to resolve them is provided in this unique collection of case studies of animal species that have been pushed to the brink of extinction Each case study provides the following information Common name Scientific name Order Family Status Threats Habitat Distribution Natural history Conflicting Issues Future and Prognosis

Conservationists are increasingly recognizing that the ultimate causes of extinction are primarily socio economic and political yet biological approaches to recovery continue to dominate More inclusive interdisciplinary conservation programs are explored here to offer better prospects for managing problems and conflicts In addition to the case studies trends and common themes are explored to provide a comprehensive interdisciplinary approach to conservation Students and teachers can explore a wide variety of endangered species programs and the conflicting issues common to recovery efforts which will enable them to evaluate conservation practice and to draw their own conclusions for improvement
