Example in this ebook The very favourable reception accorded both by Press and Public to the Circle of the Year has induced me to prepare a second volume similar in design but dealing with different branches of the same subject As the former was founded on the first series of a popular French work Les Saisons by M Hoefer so the present has been suggested by the second series but in availing myself of it I have omitted much I have revised more and at various parts my additions have been considerable And here as in my former effort I have written from a popular rather than a scientific point of view It has not been my object to sketch the outlines or lay down the foundations of any science but to show as best I could how much of wonder and beauty enters into our daily life and what inexhaustible sources of study lie at our very feet It is perhaps a misfortune of our common systems of education that they too much neglect the tuition of the eye that the young are not taught to mark the curious and interesting objects which are comprehended within their daily vision that they know so much about ancient mythology and so little about modern science so much about gods and heroes so little about stars and flowers I have called this volume Everyday Objects not because those which it describes may be seen every day but because they mostly belong to the region of the commonplace and familiar and I have called it Picturesque Aspects of Natural History because I have endeavoured in companionship with my French collaborateur to indicate the poetical side of the various sciences into which I have presumed to penetrate If it should awaken a love of nature in any breast or develop a spirit of inquiry which may lead the student further and further on the path of knowledge the labour bestowed upon these pages will not have been in vain The instinct of curiosity says M Hoefer in his preface to the first series of Les Saisons is the awakening of the intellectual life it commences with the lisping of the child accompanies the adult in every phase of his existence and far from becoming extinct with the last throb of the heart revives before the unknown shadows of the grave What then is there in the whole world of greater importance to follow and direct than the movements and impulses of this curiosity of these uncertain pulsations of the soul In this lies the secret of all education and upon education depends the future of humanity Unfortunately he continues the methods hitherto employed have been absolutely insufficient And the insufficiency is most notable as regards the imperfect and defective training given to the instinct of curiosity Observe the child Of everything which excites his attention he never fails to ask you the reason why It is thus that he enters into the connexion of cause and effect It is a sign But instead of following up this natural indication and developing the thought by the exercise of the reason we proceed as if the being under our charge were incapable of reason we overload the memory of the child with a multitude of words whose value he cannot understand until later in life and perhaps never The true direction of the mind is to proceed

from the thought to the word and not from the word to the thought It is for want of having recognised and applied this principle that our educational systems have failed so utterly To be continue in this ebook     **NRL Review** ,2012     **Color and Shape Books for All Ages** Cathie Hilterbran Cooper,2000 Color and Shape Books for All Ages calls attention to more than 450 titles focused on the concepts of color and shape The purposes of the color and shape books range from simply learning the names of colors or identifying simple shapes to recognizing intricate geometric shapes or even understanding how color affects responses moods and attitudes     *Light List* ,1946     Red Light, Green Light, Eat Right Joanna Dolgoff,2009-12-22 Childhood obesity has reached epidemic proportions More than 18 million American children are considered obese and are at risk for health problems In fact today s generation of kids may be the first to experience shorter life spans than their parents Leading pediatrician Dr Joanna Dolgoff s Red Light Green Light Eat Right teaches kids how to make healthy choices based on the principles of the traffic light green light foods are nutritious yellow light foods are eaten in moderation and red light foods are occasional treats The program which has a proven 96 percent success rate can be tailored to suit any child s age gender and weight goals Snacks and meals are designed to ensure that kids get the nutrients they need to not only lose or maintain weight but to grow strong healthy bodies Complete with sample menus recipes and an index of more than 1 000 color coded foods Red Light Green Light Eat Right provides a practical solution for one of the biggest health crises facing America s children     **Your Fertile Years** Joyce Harper,2021-04-29 Essential reading Professor Kypros Nicolaides Fills an important gap in understanding Professor Robert Winston How well do you really know your body How easy do you think it will be for you to get pregnant or NOT to get pregnant You ve probably never really been educated about your reproductive years perhaps you learnt everything you know from friends or from the media or online You might be ready for a baby now or like so many other women you might want to delay the birth of your first child while you establish your career Perhaps you re thinking about freezing your eggs Professor Joyce Harper is an internationally recognized expert on female fertility and fertility education and in 12 chapters she covers the full scope of your reproductive years from your first period to menopausal symptoms Her straightforward scientifically based advice will give you all the information you need to make informed decisions about your reproductive choices Only when you really understand your menstrual cycle works can you optimise your lifestyle to get pregnant successfully while being properly aware of how and when your fertility will decline Your Fertile Years answers all your questions about things like egg freezing and IVF and debunks not only the myths surrounding fertility treatment but also the misinformation and scare stories that surround conception and pregnancy including the bottom line on supplements diet and holistic therapies A shining beacon in the murky fertility landscape this book will accompany you through your fertile years giving you the guidance you need to make decisions that work for you your family your career and your body     *The Wonders of the Heavens* Camille Flammarion,1885     2007 *Atchafalaya River Navigation and Flood Control Book* United States.
