Dewar,2024-02-11 Pre Darwinian Evolutionists Causes which led to the speedy triumph of the theory of Natural Selection

Nature of the opposition which Darwin had to overcome Post Darwinian biology Usually accepted classification of present

day biologists as Neo Lamarckians and Neo Darwinians is faulty Biologists fall into three classes rather than two Neo

Lamarckism its defects Wallaceism its defects Neo Darwinism distinguished from Neo Lamarckism and Wallaceism Neo

Darwinism realises the strength and weakness of the theory of Natural Selection recognises the complexity of the problems

which biologists are endeavouring to solve Darwinism and evolution are not interchangeable terms On this fact it is

impossible to lay too much emphasis Charles Darwin was not the originator of the theory of evolution nor even the first to

advocate it in modern times The idea that all existing things have been produced by natural causes from some primordial

material is as old as Aristotle It was lost sight of in the mental stagnation of the Middle Ages In that dark period zoological

science was completely submerged It was not until men shook off the mental lethargy that had held them for many

generations that serious attention was paid to biology From the moment when men began to apply scientific methods to that

branch of knowledge the idea of evolution found supporters
