Mindful America Jeff Wilson,2014-07-01 Thirty years ago mindfulness was a Buddhist principle mostly obscure to the west Today it is a popular cure all for Americans daily problems A massive and lucrative industry promotes mindfulness in every aspect of life however mundane or unlikely Americans of various faiths or none at all practice mindful eating mindful sex mindful parenting mindfulness in the office mindful sports mindfulness based stress relief and addiction recovery and

hire mindful divorce lawyers Mindfulness is touted by members of Congress CEOs and Silicon Valley tech gurus and is even being taught in public schools hospitals and the military Focusing on such processes as the marketing medicalization and professionalization of meditation Jeff Wilson reveals how Buddhism shed its countercultural image and was assimilated into mainstream American culture The rise of mindfulness in America Wilson argues is a perfect example of how Buddhism enters new cultures and is domesticated in each case the new cultures take from Buddhism what they believe will relieve their specific distresses and concerns and in the process create new forms of Buddhism adapted to their needs Wilson also tackles the economics of the mindfulness movement examining commercial programs therapeutic services and products such as books films CDs and even smartphone applications Mindful America is the first in depth study of this phenomenon invaluable for understanding how mindfulness came to be applied to such a vast array of non religious concerns and how it can be reconciled with traditional Buddhism in America *Buddhisms and Deconstructions* Jin Y. Park, 2006-03-10 *Buddhisms and Deconstructions* considers the connection between Buddhism and Derridean deconstruction focusing on the work of Robert Magliola Fourteen distinguished contributors discuss deconstruction and various Buddhisms Indian Tibetan and Chinese Chan followed by an afterword in which Magliola responds directly to his critics **Race and Religion in American Buddhism** Joseph Cheah, 2011-10-28 While academic and popular studies of Buddhism have often neglected race as a factor of analysis the issues concerning race and racialization have remained not far below the surface of the wider discussion among ethnic Buddhists converts and sympathizers regarding representations of American Buddhism and adaptations of Buddhist practices to the American context In *Race and Religion in American Buddhism* Joseph Cheah provides a much needed contribution to the field of religious studies by addressing the under theorization of race in the study of American Buddhism Through the lens of racial formation Cheah demonstrates how adaptations of Buddhist practices by immigrants converts and sympathizers have taken place within an environment already permeated with the logic and ideology of whiteness and white supremacy In other words race and religion Buddhism are so intimately bounded together in the United States that the ideology of white supremacy informs the differing ways in which convert Buddhists and sympathizers and Burmese ethnic Buddhists have adapted Buddhist religious practices to an American context Cheah offers a complex view of how the Burmese American community must negotiate not only the religious and racial terrains of the United States but also the transnational reach of the Burmese junta *Race and Religion in American Buddhism* marks an important contribution to the study of American Buddhism as well as to the larger fields of U S religions and Asian American studies *A Coat of Many Colors* Walter Conser, 2006-09-04 While religious diversity is often considered a recent phenomenon in America the Cape Fear region of southeastern North Carolina has been a diverse community since the area was first settled Early on the region and the port city of Wilmington were more urban than the rest of the state and thus provided people with opportunities seldom found in other parts of North Carolina This area drew residents from many ethnic backgrounds and the

men and women who settled there became an integral part of the region's culture. Set against the backdrop of national and southern religious experience, *A Coat of Many Colors* examines issues of religious diversity and regional identity in the Cape Fear area. Author Walter H. Conser Jr. draws on a broad range of sources including congregational records, sermon texts, liturgy, newspaper accounts, family memoirs, and technological developments to explore the evolution of religious life in this area. Beginning with the story of prehistoric Native Americans and continuing through an examination of life at the end of the twentieth century, Conser tracks the development of the various religions, denominations, and ethnic groups that call the Cape Fear region home. From early Native American traditions to the establishment of the first churches, cathedrals, synagogues, mosques, and temples, *A Coat of Many Colors* offers a comprehensive view of the religious and ethnic diversity that have characterized Cape Fear throughout its history. Through the lens of regional history, Conser explores how this area's rich religious and racial diversity can be seen as a microcosm for the South, and he examines the ways in which religion can affect such diverse aspects of life as architecture and race relations.
