Lusternik-Schnirelmann Category Octavian Cornea, 2003 Lusternik Schnirelmann category is like a Picasso painting Looking at category from different perspectives produces completely different impressions of category's beauty and applicability from the Introduction Lusternik Schnirelmann category is a subject with ties to both algebraic topology and dynamical systems The authors take LS category as the central theme and then develop topics in topology and dynamics around it Included are exercises and many examples The book presents the material in a rich expository style The book provides a unified approach to LS category including foundational material on homotopy theoretic aspects the Lusternik Schnirelmann theorem on critical points and more advanced topics such as Hopf invariants the construction of functions with few critical points connections with symplectic geometry the complexity of algorithms and category of 3 manifolds This is the first book to synthesize these topics It takes readers from the very basics of the subject to the state of the art Prerequisites are few two semesters of algebraic topology and perhaps differential topology It is suitable for graduate students and researchers interested Lusternik-Schnirelmann Category and Related Topics Octavian Cornea, 2002 This collection is the proceedings volume for the AMS IMS SIAM Joint Summer Research Conference Lusternik Schnirelmann Category held in 2001 at Mount Holyoke College in Massachusetts The conference attracted an international group of 37 participants that included many leading experts The contributions included here represent some of the field's most able practitioners With a surge of recent activity exciting advances have been made in this field including the resolution of several long standing conjectures Lusternik Schnirelmann category is a numerical homotopy invariant that also provides a lower bound for the number of critical points of a smooth function on a manifold The study of this invariant together with related notions forms a subject lying on the boundary between homotopy theory and critical point theory These articles cover a wide range of topics from a focus on concrete computations and applications to more abstract extensions of the fundamental ideas The volume includes a survey article by P Hilton that discusses earlier results from homotopy theory that form the basis for more recent work in this area In this volume professional mathematicians in topology and dynamical systems as well as graduate students will catch glimpses of the most recent views of the subject On the Lusternik Schnirelmann Category ... Andrica, 1993 *Handbook of Algebraic Topology* I.M. James, 1995-07-18 Algebraic topology also known as homotopy theory is a flourishing branch of modern mathematics It is very much an international subject and this is reflected in the background of the 36 leading experts who have contributed to the Handbook Written for the reader who already has a grounding in the subject the volume consists of 27 expository surveys covering the most active areas of research They provide the researcher with an up to date overview of this exciting branch of mathematics

Cohomological Methods in Homotopy Theory Jaume Aguade, Carles Broto, Carles Casacuberta, 2012-12-06 This book contains a collection of articles summarizing the state of knowledge in a large portion of modern homotopy theory A call for articles was made on the occasion of an emphasis semester organized by the Centre de Recerca Matemàtica in Bellaterra Barcelona in 1998 The main topics treated in the book include abstract features of stable and unstable homotopy homotopical localizations p compact groups H spaces classifying spaces for proper actions cohomology of discrete groups K theory and other generalized cohomology theories configuration spaces and Lusternik Schnirelmann category The book is addressed to all mathematicians interested in homotopy theory and in geometric aspects of group theory New research directions in topology are highlighted Moreover this informative and educational book serves as a welcome reference for many new results and recent methods **Literature on Lusternik-Schnirelmann Category** Dorin Andrica, 1993 *On Lusternik-schnirelmann Category and Genus* Hanxuan Che, 1988
