Crime and Society in England Clive Emsley, 2013-09-13 Acknowledged as one of the best introductions to the history of crime in the eighteenth and nineteenth centuries *Crime and Society in England 1750 1900* examines the developments in policing the courts and the penal system as England became increasingly industrialised and urbanised The book challenges the old but still influential idea that crime can be attributed to the behaviour of a criminal class and that changes in the criminal justice system were principally the work of far sighted humanitarian reformers In this fourth edition of his now classic account Professor Emsley draws on new research that has shifted the focus from class to gender from property crime to violent crime and towards media constructions of offenders while still maintaining a balance with influential early work in the area Wide ranging and accessible the new edition examines the value of criminal statistics the effect that contemporary ideas about class and gender had on perceptions of criminality changes in the patterns of crime developments in policing and the spread of summary punishment the increasing formality of the courts the growth of the prison as the principal form of punishment and debates about the decline in corporal and capital punishments Thoroughly updated throughout the fourth edition also includes for the first time illuminating contemporary illustrations **The Photo-beacon**, 1893 "Art in the North of England, 1979?008 " Gabriel N. Gee, 2017-07-05 Based on rare archival material and numerous interviews with practitioners *Art in the North of England 1979 2008* analyses the relation between political and economic changes stemming from the 1980s and artistic developments in the principal cities of the North of England in the late 20th century Looking in particular at the art scenes of Liverpool Manchester Leeds Sheffield and Newcastle Gabriel Gee unveils a set of powerful aesthetic reactions to industrial change and urban reconstruction during this period on the part of artists including John Davies Pete Clarke the Amber collective Richard Wilson Karen Watson Nick Crowe Ian Rawlinson John Kippin and the contribution of organisations such as Projects UK Locus East Street Arts the Henry Moore Sculpture Trust and the Bluecoat Gallery in Liverpool While the geographical focus of this study is highly specific a key concern throughout is the relationship between regional national and international artistic practices and identities Of interest to all scholars and students concerned with the developments of British art in the second half of the 20th century the study is also of direct pertinence to observers of global narratives which are here described and analysed through the concept of trans industriality

Television and British Cinema Hannah Andrews, 2014-05-07 Undertaking a thorough and timely investigation of the relationship between television and cinema in Britain since 1990 Hannah Andrews explores the convergence between the two forms at industrial cultural and intermedial levels and the ways in which the media have also been distinguished from one another through discourse and presentation **From Sea Charts to Satellite Images** David Buisseret, 1990-06-22 The authors write authoritatively and crisply How to use maps in teaching is spelled out carefully but the authors also manage to sketch in the background of American mapping so the book is both a manual and a history Commentaries are sprinkled with

stimulating new ideas for instance on how to use bird's eye views and country atlases in the classroom and there are didactic discussions on maps showing the walking city and the impact of the street car An extraordinarily wide range of maps is depicted which makes for good browsing pondering and close study This is a very good highly attractive and worthwhile book it will have great impact on the use of old and new maps in teaching As well this is a tantalizing survey of mapping the United States and will whet the appetites of students and encourage them to learn more about maps and their origins John Warkentin Cartographica
