Mixed Methods Research Outside the Box Joseph A. Maxwell, 2024-11-22 In *Mixed Methods Research Outside the Box* Joseph A. Maxwell shows readers how to carry out

unconventional yet effective mixed methods research Providing a new way to think about and combine qualitative and quantitative research this readable text takes a broad view of mixed methods revealing the largely unrecognized early history of mixed methods research and its current diversity across disciplines Maxwell brings together work on combining qualitative and quantitative methods from a variety of disciplines and puts them in conversation with one another He identifies mixed methods philosophical bases presenting an interactive model of design that more closely integrates qualitative and quantitative elements and emphasizes the complementarity of qualitative and quantitative methods for understanding causation and generalization Drawing from recent works on causation integration and philosophy of science this text promotes innovations in mixed methods such as process tracing in political science and design based research in education This groundbreaking book provides readers with a new way of thinking about developing and conducting mixed methods research

Human Geopolitics Alan Gamlen, 2019-05-02 Human geopolitics the competition for population rather than territory is an essential but weakly understood dimension of world politics today Such competition has preceded violent conflict throughout history but has been muted since the Treaties of Westphalia laid the territorial foundations of the modern international system in the mid seventeenth century Today however human geopolitics is being resurrected in unanticipated ways as governments are enabled and encouraged to engage their emigrant diasporas How and why is this happening Until now these questions have been difficult to answer The majority of research attention has focused on questions of immigration policy in a handful of wealthy migrant destination countries largely ignoring the emigration policies that preoccupy the worlds many migrant origin states This book addresses that research imbalance by focusing on the overlooked sending side of migration policy Drawing on data covering all UN members across the post WWII period and fieldwork with high level policy makers across 60 states and a dozen international organisations the book charts the re emergence of human geopolitics through the global spread of diaspora institutions government ministries and offices dedicated to emigrants and their descendants It calls for the development of stronger guiding principles and evaluation frameworks to govern these new state diaspora relations in an era of unprecedented global interdependence

faculty of higher education scientists researchers sociologists computer scientists and academicians **Research Methods and Methodologies in Education** Robert Coe, Michael Waring, Larry V Hedges, James Arthur, 2017-03-20 Best selling all encompassing textbook for research methods in education **Philosophical Foundations of Mixed Methods Research** Yafeng Shan, 2023-12-01 Philosophical Foundations of Mixed Methods Research provides a comprehensive examination of the philosophical foundations of mixed methods research It offers new defences of the seven main approaches to mixed methods the pragmatist approach the transformative approach the indigenous approach the dialectical approach the dialectical pluralist approach the performative approach and the realist approach written by leading mixed methods researchers Each approach is accompanied by critical reflections chapter from philosophers point of view The book shows the value of the use of mixed methods from a philosophical point of view and offers a systematic and critical examination of these positions and approaches from a philosophical point of view The volume also offers a platform to promote a dialogue between mixed methods researchers and philosophers of science and provides foundations for further research and teaching of this hotly debated topic This volume is ideal for researchers and advanced students and anyone who is interested in research methods and the social sciences more generally **Strategies of Qualitative Inquiry** Norman K. Denzin, Yvonna S. Lincoln, 2012-10-24 This book is the second of three paperback volumes taken from The SAGE Handbook of Qualitative Research Fourth Edition This volume isolates the major strategies historically the research methods that researchers can use in conducting concrete qualitative studies The question of methods begins with questions of design and the matters of money and funding These questions always begin with the researcher who moves from a research question to a paradigm or perspective and then to the empirical world The history and uses of these strategies are explored extensively in this volume The chapters move from forms and problems with mixed methods inquiry to case study performance and narrative ethnography to constructionist analytics to grounded theory strategies testimonies participatory action research and clinical research **Contrasts and Effect Sizes in Behavioral Research** Robert Rosenthal, Ralph L. Rosnow, Donald B. Rubin, 2000 Contrasts are statistical procedures for asking focused questions of data Compared to diffuse or omnibus questions focused questions are characterized by greater conceptual clarity and greater statistical power when examining those focused questions If an effect truly exists we are more likely to discover it and to believe it to be real when asking focused questions rather than omnibus ones Researchers teachers of research methods and graduate students will be familiar with the principles and procedures of contrast analysis but will also be introduced to a series of newly developed concepts measures and indices that permit a wider and more useful application of contrast analysis This volume takes on this new approach by introducing a family of correlational effect size estimates
