Research Methods for Environmental Studies Mark Kanazawa, 2017-10-18 The methodological needs of environmental studies are unique in the breadth of research questions that can be posed calling for a textbook that covers a broad swath of approaches to conducting research with potentially many different kinds of evidence Written specifically for social science based research into the environment this book covers the best practice research methods most commonly used to study the environment and its connections to societal and economic activities and objectives Over five key parts Kanazawa introduces quantitative and qualitative approaches mixed methods and the special requirements of interdisciplinary research emphasizing that methodological practice should be tailored to the specific needs of the project Within these parts detailed coverage is provided on key topics including the identification of a research project spatial analysis ethnography approaches interview technique and ethical issues in environmental research Drawing on a variety of extended examples to encourage problem based learning and fully addressing the challenges associated with interdisciplinary investigation this book will be an essential resource for students embarking on courses exploring research methods in environmental studies

Research

Handbook on Employee Pro-Environmental Behaviour Victoria K. Wells, Diana Gregory-Smith, Danae Manika, 2018 This Research Handbook brings together leading academics of employee pro environmental behaviour to highlight the key features and challenges of this growing field The international contributors draw on studies from across the methodological spectrum examine employee behaviour and discuss how pro environmental behaviour can be fostered and encouraged inspecting the impact for organisations

Environmental Design Evaluation Arnold Friedmann, Craig Zimring, Ervin Zube, 2013-12-14 As the nature of the field of environment behavior relations is interdisciplinary the collaboration of three persons of diverse professional backgrounds in writing this book is therefore not surprising This collaboration started in 1972 with the offering of a graduate seminar Environment Behavior and Design Evaluation at the University of Massachusetts Several research projects dealing with design evaluation which have been conducted at the University are also included as case studies in this book Chapter III the ELEMNR study and the Visitor Center study Two of the authors have worked as part of the instructional team in the seminar and all of the authors have participated in varying degrees in the ELEMNR Project The authors backgrounds in design psychology and landscape architecture suggest by example that professionals with diverse backgrounds but a common interest in environment behavior problems can indeed learn to communicate and to collaborate Since design evaluation is a new field and very little specific literature on the subject exists to date we hope this book fills a current need

*Digital Landscape Architecture: Logic, Structure, Method and Application* Yuning Cheng, 2023-05-13 Closely related to the frontier research field of digital technology this book reshapes the planning and design process of landscape architecture from theoretical and practical levels It gives a full scale discussion to the logic structure method and application of digital landscape architecture leading this field to a new era of perception quantification research mode Readers will get a comprehensive understanding of digital landscape architecture know about multiple digital methods for landscape planning and design and learn a lot of practical projects with digital technology And it will inspire the readers to think about new patterns and approaches to landscape planning rather than traditional ways This book is organized under a clear logic which helps the readers easily get the core of the work A lot of logic diagrams showing between the theoretical paragraphs highly summarize the key points of the book providing a better readability and acceptability This book also contains many detailed drawings and graphics for the project cases which gives a good demonstration of how digital methods could be applied in practice

*An Introduction to Scientific Research Methods in Geography and Environmental Studies*  
Daniel Montello, Paul Sutton, 2012-12-10 Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation From chapters on the scientific method and fundamental research concepts to experimental design sampling and statistical analysis the text offers an excellent introduction to the key concepts of geographical research The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters Joseph Mallalieu School of Geography Leeds University Montello and Sutton is one of the best texts I ve used in seminars on research methodology The text offers a clear balance of quantitative vs qualitative and physical vs human which I ve found particularly valuable The chapters on research ethics scientific communication information technologies and data visualization are excellent Kenneth E Foote Department of Geography University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of scientific research covering both geography and environmental studies Written for undergraduate and postgraduate students it Explains both the conceptual and the technical aspects of research as well as all phases of the research process Combines approaches in physical geography and environmental science human geography and human environment relations and geographic and environmental information techniques such as GIS cartography and remote sensing Combines natural and social scientific approaches common to subjects in geography and environmental studies Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying scientific research methods in

geography environmental studies and related disciplines such as planning and earth science **International Handbook of Research on Environmental Education** Robert B. Stevenson, Michael Brody, Justin Dillon, Arjen E.J. Wals, 2013-05-02 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed Published for the American Educational Research Association AERA **NBS Special Publication** ,1980 *The Psychology of Green Organizations* Jennifer L. Robertson PhD, Julian Barling PhD, 2015-01-20 As we move further into the 21st century the global challenges and consequences posed by climate change are becoming increasingly apparent Although organizations are considered significant contributors to climate change they also have the potential to positively affect it through their employees As a result understanding how employees pro environmental initiatives can positively affect climate change has increasingly become the focus of inquiry among organizational researchers The Psychology of Green Organizations brings together a number of these researchers to review leading research in different areas of organizational environmental sustainability In so doing this book consolidates available knowledge on employees contributions to corporate environmental initiatives stimulates future empirical research on this topic and provides recommendations for how organizations can improve their environmental performance through their employees Many chapters provide case examples of environmentally sustainable organizations to illustrate lessons gleaned from research Chapters in part 1 provide a conceptual theoretical and methodological foundation for research on workplace pro environmental behaviors while those in parts 2 and 3 review research on the promotion of workplace pro environmental behaviors at the individual and organizational levels respectively Part 4 explores one organization that has been successful at promoting employees environmental initiatives highlighting how both organizational and individual factors can be used to effect major changes in corporate environmental sustainability

**Handbook of Research methods and Applications in Environmental Studies** Matthias Ruth, 2015-08-28 This Handbook presents methods to advance the understanding of interdependencies between the well being of human societies and the performance of their biophysical environment It showcases applications to material and energy use urbanization and tech Psychological and Behavioral Decision Making of Green Consumption Ruyin Long, Hong Chen, Xiuping Li, 2022-11-11 Proceedings of the 2024 3rd International Conference on Social Sciences and Humanities and Arts (SSHA 2024) Mohd Fauzi bin Sedon, Intakhab Alam Khan, Mehmet Cüneyt Birkök, KinSun Chan, 2024-06-20 This is an open access book With the

progress of social civilization social science and its research are becoming more and more important Theoretically and practically the study of social phenomena and social problems and the development of prosperous social sciences are the eternal themes of human beings At present social science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc New Developments in Behavioral Research: Theory, Method and Application Barbara C. Etzel, Judith M. LeBlanc, Donald M. Baer, 2020-09-10 Originally published in 1977 these examples of research and scholarly argument were collected in honor of Professor Sidney W Bijou In the language of academics they constitute a Festschrift a festival of scholarly writing performed to celebrate the career of a person who produced and stimulated others to produce exactly such contributions throughout a long valuable and productive professional history Since 1955 Dr Bijou had worked almost exclusively within the approach variously labelled as the functional analysis of behavior the experimental analysis of behavior operant conditioning or Skinnerian psychology From his point of view it seems clear the first of these labels was the correct one It was the principle of objective direct observable analysis that attracted him

**Corporate Social Responsibility and Organizational Psychology: Quid pro Quo** Ante Glavas, Chelsea R. Willness, David A. Jones, 2017-07-05 Researchers corporate leaders and other stakeholders have shown increasing interest in Corporate Social Responsibility CSR a company s discretionary actions and policies that appear to advance societal well being beyond its immediate financial interests and legal requirements Spanning decades of research activity the scholarly literature on CSR has been dominated by meso and macro level perspectives such as studies within corporate strategy that examine relationships between firm level indicators of social environmental performance and corporate financial performance In recent years however there has been an explosion of

micro oriented CSR research conducted at the individual level of analysis especially with respect to studies on how and why job seekers and employees perceive and react to CSR practices This micro level focus is reflected in 12 articles published in this edited volume as a research topic collection in Frontiers in Psychology Organizational Psychology Specialty Section titled Corporate social responsibility and organizational psychology Quid pro quo Behavioral Research Methods in Environmental Design William M.
