Electrochemistry of Nucleic Acids and Proteins E. Palecek, F. Scheller, J. Wang, 2005 Covers highly sophisticated methods of electrochemical analysis of nucleic acids and proteins Summarises the present state of electrochemical analysis of nucleic acids and proteins Includes future trends in the electrochemical analysis in genomics and proteomics INDICE 1 Polarography of DNA Retrospective 2 Electrochemical properties of nucleic acid components 3 Electrochemistry of nucleic acids 4 Electroch Etc Biophysical, Chemical, and Functional Probes of RNA Structure, Interactions and Folding: Part A Daniel Herschlag, 2009-11-16 This MIE volume provides laboratory techniques that aim to predict the structure of a protein which can have tremendous implications ranging from drug design to cellular pathways and their dynamics to viral entry into cells Expert researchers introduce the most advanced technologies and techniques in protein structure and folding Includes techniques on tiling assays *Complex Enzymes in Microbial Natural Product Biosynthesis, Part A: Overview Articles and Peptides*, 2009-04-10 Microbial natural products have been an important traditional source of valuable antibiotics and other drugs but interest in them waned in the 1990s when big pharma decided that their discovery was no longer cost effective and concentrated instead on synthetic chemistry as a source of novel compounds often with disappointing results Moreover understanding the biosynthesis of complex natural products was frustratingly difficult With the development of molecular genetic methods to isolate and manipulate the complex microbial enzymes that make natural products unexpected chemistry has been revealed and interest in the compounds has again flowered This two volume treatment of the subject will showcase the most important chemical classes of complex natural products the peptides made by the assembly of short chains of amino acid subunits and the polyketides assembled from the joining of small carboxylic acids such as acetate and malonate In both classes variation in sub unit structure number and chemical modification leads to an almost infinite variety of final structures accounting for the huge importance of the compounds in nature and medicine Gathers tried and tested methods and techniques from top players in the field In depth coverage of ribosomally synthesised and Non ribosomally synthesised peptides Provides an extremely useful reference for the experienced research scientist **Protein Sensors and Reactive Oxygen Species, Part B: Thiol Enzymes and Proteins**, 2002-03-06 This volume of Methods in Enzymology is a companion to Volume 347 and addresses direct sensing of reactive oxygen species and related free radicals by thiol enzymes and proteins **Applications of Chimeric Genes and Hybrid Proteins, Part C: Protein-Protein Interactions and Genomics**, 2000-10-28 The critically acclaimed laboratory standard for more than forty years Methods in Enzymology is one of the most highly respected publications in the field of biochemistry Since 1955 each volume has been eagerly awaited frequently consulted and praised by researchers and reviewers alike Now with more than 300 volumes all of them still in print the series contains much material still relevant today truly an essential publication for researchers in all fields of life sciences **Applications of Chimeric Genes and Hybrid Proteins, Part B: Cell Biology and Physiology**, 2000-10-17
