

7 Methods of Studying Human Behaviour

by Aman Sharma

Some of the important methods of Studying Human Behaviour as Formulated by Psychologists are as follows: 1. Introspection Method 2. Observation Method 3. Experimental Method 4. Clinical Method/Case History Method 5. Survey Method 6. Genetic Method 7. Testing Method.

1. Introspection Method:

This method was introduced by EB Titchener. This is also known as self-observation method. Introspection means 'to look within'.

It is not possible to understand the inner feelings and experiences of other persons. But the individual himself can observe and report.

Example: A patient can report about his pains and other disturbances in a better way than by a nurse. He will look within himself and explain how he is feeling. This will help for a better treatment. Though Introspection is a useful method, it has some demerits also.

These are:

(a) We cannot verify the reports given by the observer hence we have to accept his report. At times even if he is reporting correctly there may be distortions

(b) This method cannot be used to study children, animals and persons suffering from mental disorders. But this is a cheap and easy method.

2. Observation Method:

This method is very useful in the areas where experiments cannot be conducted. In this method the observer will observe and collect the

Lawler, Kathleen M. Carley, 1996 *The Psychology of Religious Adjustment* Edmund Smith Conklin, 1929 I have written this book with the profound conviction that it is profitable to keep the field of psychology distinct from theology and the philosophy of religion While I am not ignorant of theology and the philosophy of religion I have studiously sought to keep such knowledge as I have of those subjects entirely in the background The book is written as a study of certain forms of human behavior and for me a study of behavior must include the conscious accompaniments It should not however be looked upon as anything more than a study of behavior There is in it no intentional brief for any form of religious faith nor for any form of anti religious doctrine There is no reason of course why the material here presented should not be utilized by theologians and philosophers of religion for its larger significances if they find anything which seems of possible service to them But my aim has been the more humble one of seeking merely to bring together facts and psychological interpretations of religious conduct and to consider them in the light of contemporary psychological thought I am confident that this procedure has greatly clarified my own thinking on these subjects I hope it may do as much for others Preface PsycINFO Database Record c 2010 APA all rights reserved **Statistical Methods for Communication Science** Andrew F.
