Chander,Jacques Drèze,C. Knox Lovell,Jack Mintz,2007-01-16 Over the last forty years the field of public economics has emerged as a modern successor to public finance It has gained importance on the research agenda of economists and in the curricula of economics departments It has become a diversified field rich in theoretical developments and substantive applications Beyond the traditional concerns with taxation or public goods a number of new concerns have entered the scene concerning for instance public sector pricing the management of public firms social security or federalism A comprehensive presentation of the field extends nowadays beyond the scope of textbooks and requires access to a growing specialised literature The present volume collecting 22 papers published by Henry Tulkens over the period 1978 2003 is offered as an illustration of these new developments The illustration has three dimensions approach s ject matters and methods Coming from a single author admittedly assisted by 18 co authors the different papers are illustrative of an underlying general approach which I like to label operational public economics With these simple words I mean an approach under which issues in public economics are formulated so as to capture essential elements of actual situations Typically this leads to theoretical models more complex than standard textbook formulations It is then up to the public economist to extend the theory as needed to fit the situation **Models, Planning and Basic Needs** Sam Cole,Henry Lucas,2013-10-22 Models Planning and Basic

Needs focuses on the use of models in integrated planning policy analysis determination of basic needs and economics The selection first offers information on the Latin American world model as a tool of analysis and integrated planning at a national and regional level in developing countries including planning and the tools of planning and the Latin American model and integrated planning The text also looks at the social indicators and the basic needs approach and internal regional and distributional aspects of global models The text elaborates on the adaptation of the Bariloche model to a national scenario and the BACHUE Philippines model Topics include calibration of the Bariloche model for Brazil economic sub model policy analyses and egalitarian strategy The publication also focuses on a model of the relation between technology and North South income distribution and development planning and dependence The design of models determination of basic

needs and inclusion of social and political factors into models are also discussed The selection is a dependable reference for readers interested in the use of models in planning economics policy analysis and technology **Appropriate**

Technologies for Third World Development Austin Robinson,1979-08-23 *Socialist Economic Development in the 21st Century* Alberto Gabriele,Elias Jabbour,2022-03-02 Over a hundred years after the first socialist revolution broke the global monopoly of capitalism a new class of socialist oriented socioeconomic development is coming to the fore Capitalism is still dominant worldwide although its hegemony is no longer undisputed and humankind is now faced with a key existential challenge This book proposes an alternative path to overcoming the worldwide crisis of globalized capitalism It offers a novel balanced and historically rooted interpretation of the successes and failures of socialist economic construction throughout the last century The authors apply a multidisciplinary holistic and purpose based methodology to draw basic lessons from stylized facts emerging in different areas of knowledge ranging from political economy to biology and from key national socioeconomic experiences with a particular focus on China The book is divided into three parts The first is mainly theoretical and general in nature identifying the major contributions bequeathed by the hard sciences to their social counterparts Consistent with these findings the authors offer a stylized interpretation of the contemporary state of the art of the debate on the core concepts of economic science and advance a few elementary theories about what socialism in the 21st century could look like The second and third parts analyze and discusses the core features of a few select experiences which have evolved in certain countries since 1917 some of which are still unfolding The book will find an audience among academics researchers and students in the fields of economics political science history and geography as well as policy makers particularly in developing countries **The Microeconomic Foundations of Macroeconomics** G.C.
