Methods of Resolving Conflicts between Treaties Seyed-Ali Sadat-Akhavi, 2021-10-18 Despite the theoretical and practical importance of the question of conflict between treaties little has been written on the subject This monograph fills this gap by providing a detailed analysis of the main issues The book is divided into three parts The first deals with the definition of conflict causes of conflict and different types of conflict The second part examines different sources of international law in order to identify rules of international law relating to the resolution of conflicts The third part addresses the actual process of resolving conflicts between treaties After describing different stages of treaty conflict resolution it discusses some special principles advanced for resolving conflicts between certain types of treaties namely those relating to the protection of human rights those concerning dispute settlement and treaties dealing with private law issues

The Law of Treaties Beyond the Vienna Convention Mahnoush H. Arsanjani, 2011-02-17 This book offers a comprehensive analysis of the law of treaties based on the interplay between the

1969 Vienna Convention on the Law of Treaties and customary international law Written by a team of renowned international lawyers it offers new insight into the basic concepts and methodology of the law of treaties and its problems **Sustainable Development As a Principle of International Law** Christina Voigt, 2009 This volume provides a framework for the doctrinal foundation of sustainable development as a principle of integration in international law The work departs from the fragmented nature of the international legal system a system that lacks integrative principles for creating coherent relations between for example the international trade regime of the WTO and multilateral environmental agreements The specific focus is on a legal analysis of potential normative conflicts between climate measures as regulated by the UNFCCC and the Kyoto Protocol in particular the flexibility instruments of international emissions trading and the Clean Development Mechanism and the rules of the WTO Attention is then given to the application of sustainable development as a principle of integration in relation to these conflicts The book takes on several important timely and demanding tasks related to the urgent global challenge of climate change and the capacity of international law to deal with complex and multifaceted issues It addresses in particular a The relations between various international legal regimes especially between international trade law and climate law a The legal status of sustainable development as a principle of international law and a The analysis of interpretative methods and of principles that may serve to address conflicts between rules pertaining to different legal regimes Here integration as part of legal reasoning becomes particularly relevant **American Book Publishing Record**, 2005 **The International Law Foundations of Palestinian Nationality** Mutaz M. Qafisheh, 2008 By the end of British rule in Palestine on 14 May 1948 Palestinian nationality had become well established in accordance with both domestic law and international law Accordingly the legal origin of Palestinian nationality lies in this nearly thirty year period as the status of Palestinians has never been settled since Hence any legal consideration on the future status of individuals who once held Palestinian nationality should start from the point at which the British rule over Palestine was terminated This work provides a legal basis for future settlement of the status of Palestinians of all categories that emerged in some sixty years following the end of the Palestine Mandate Israeli citizens inhabitants of the occupied territory and Palestinian refugees In conclusion nationality as regulated by Britain in Palestine represents an international status that cannot be legally altered except in accordance with international law **Yearbook of the European Convention on Human Rights/Annuaire de la convention europeenne des droits de l'homme, Volume 47 (2004)** Council of Europe/Conseil de l'Europe, 2005-09-15 This volume of the Yearbook of the European Convention on Human Rights prepared by the Directorate of Human Rights of the Council of Europe relates to 2004 Part one contains information on the Convention Part two deals with the control mechanism of the European Convention on Human Rights selected judgments of the European Court of Human Rights and human rights DH resolutions of the Committee of Ministers part three groups together the other work of the Council of Europe in the field of human rights and includes the work of the Committee of Ministers the Parliamentary Assembly and the

Europe's Constitutional Mosaic Neil Walker, Josephine Shaw, Stephen Tierney, 2011-06-14 This book emerged from an extended seminar series held in Edinburgh Law School which sought to explore the complex constitutional arrangements of the European legal space as an inter connected mosaic There has been much recent debate concerning the constitutional future of Europe focusing almost exclusively upon the EU in the context of the failed Constitutional Treaty of 2003 5 and the subsequent Treaty of Lisbon The premise of the book is that this focus while indispensable offers only a partial vision of the complex constitutional terrain of contemporary Europe In addition it is essential to explore other threads of normative authority within and across states embracing internal challenges to state level constitutional regimes the growing jurisprudential assertiveness of the Council of Europe regime through the ECHR and various democracy building measures as well as Europe's ever thicker relations both with its border regions and with broader international institutions especially those of the United Nations Together these developments create increasingly dense networks of constitutional authority within the European space This fluid and multi dimensional dynamic is difficult to classify and indeed may seem in many ways impenetrable but that makes the explanatory challenge all the more important and pressing Without this fuller picture it becomes impossible to understand the legal context of Europe today or the prospects of ongoing changes The book brings together a range of experts in law legal theory and political science from across Europe in order to address these complex issues and to supply illustrative case studies in the topical areas of the constitutionalisation of European labour law and European criminal law

Regime Interaction in International Law Margaret A. Young, 2012-01-12 Leading scholars advance the discussion of international law's fragmentation in new and provocative ways

Normative Pluralism and International Law Jan Klabbers, Touko Piiparinen, 2013-04-22 This book addresses conflicts involving different normative orders what happens when international law prohibits behavior but the same behavior is nonetheless morally justified or warranted Can the actor concerned ignore international law under appeal to morality Can soldiers escape legal liability by pointing to honor Can accountants do so under reference to professional standards How in other words does law relate to other normative orders The assumption behind this book is that law no longer automatically claims supremacy but that actors can pick and choose which code to follow The novelty resides not so much in identifying conflicts but in exploring if when and how different orders can be used intentionally In doing so the book covers conflicts between legal orders and conflicts involving law and honor self regulation *lex mercatoria* local social practices bureaucracy religion professional standards and morality

Deference in International Courts and Tribunals Lukasz Gruszczynski, Wouter Werner, 2014-10-09 International courts and tribunals are often asked to review decisions originally made by domestic decision makers This can often be a source of tension as the international

courts and tribunals need to judge how far to defer to the original decisions of the national bodies As international courts and tribunals have proliferated different courts have applied differing levels of deference to those original decisions which can lead to a fragmentation in international law International courts in such positions rely on two key doctrines the standard of review and the margin of appreciation The standard of review establishes the extent to which national decisions relating to factual legal or political issues arising in the case are re examined in the international court The margin of appreciation is the extent to which national legislative executive and judicial decision makers are allowed to reflect diversity in their interpretation of human rights obligations The book begins by providing an overview of the margin of appreciation and standard of review recognising that while the margin of appreciation explicitly acknowledges the existence of such deference the standard of review does not it is rather a procedural mechanism It looks in depth at how the public policy exception has been assessed by the European Court of Justice and the WTO dispute settlement bodies It examines how the European Court of Human Rights has taken an evidence based approach towards the margin of appreciation as well as how it has addressed issues of hate speech The Inter American system is also investigated and it is established how far deference is possible within that legal organisation Finally the book studies how a range of other international courts such as the International Criminal Court and the Law of the Sea Tribunal have approached these two core doctrines

Religious Actors and International Law Ioana Cismas, 2014-07-17 This book assesses whether a new category of religious actors has been constructed within international law Religious actors through their interpretations of the religion s they are associated with uphold and promote or indeed may transform potentially oppressive structures or discriminatory patterns This study moves beyond the concern that religious texts and practices may be incompatible with international law to provide an innovative analysis of how religious actors themselves are accountable under international law for the interpretations they choose to put forward The book defines religious actors as comprising religious states international organizations and non state entities that assume the role of interpreting religion and so claim a special legitimacy anchored in tradition or charisma Cutting across the state non state divide this definition allows the full remit of religious bodies to be investigated It analyses the crucial question of whether religious actors do in fact operate under different international legal norms to non religious states international organizations or companies To that end the Holy See Vatican the Organization of Islamic Cooperation and churches and religious organizations under the European Convention on Human Rights regime are examined in detail as case studies The study ultimately establishes that religious actors cannot be seen to form an autonomous legal category under international law they do not enjoy special or exclusive rights nor incur lesser obligations when compared to their respective non religious peers Going forward it concludes that a process of two sided legitimation may be at stake religious actors will need to provide evidence for the legality of their religious interpretations to strengthen their legitimacy and international law itself may benefit from religious actors fostering its legitimacy in different cultural contexts
