Evolution Politics and Charisma Why do Populists Win shines compelling new light on the way in which the systematic targeting and manipulation of human physiology remain a cornerstone of all populist political campaigns Readers wishing to make sense of the populist juggernauts of Trump and Brexit and of the cyclical and formulaic nature of the rise and fall of charismatic populism will find this book particularly appealing Elesa Zehndorfer begins by presenting a highly applied explanation of the critical importance of political physiology physiology theory neuroscience and evolutionary biology in populist charismatic politics She later eloquently explains how manipulation of physiological variables such as heightened testosterone and dopamine renders the political rally one of the most powerful weapons in a populist leaders campaign Weber s seminal conceptualisation of charisma in statu nascendi and Hyman Minsky s insightful theories of cyclical boom and bust scenarios are then juxtaposed alongside physiological theory to greatly amplify our understanding of the powerful biological antecedents of charismatic populism These theoretical observations are then applied directly to recent high profile populist campaigns including the 2016 Trump Presidential campaign and early Presidency and the Brexit referendum to elucidating and compelling effect Ultimately *Evolution Politics and Charisma* paints a clear evolutionary picture of the way in which politics is an emotional not a rational process where our emotions are continually targeted to great and strategic effect and where the most recent intersection of technology and physiology has driven the greatest surge in populism ever seen across the Western hemisphere since the 1930 s Acknowledging this reality opens up exciting vistas in our understanding of the true power of charismatic populism and provides answers as to how its seductive and often dangerous power can be effectively resisted

L. Travers and Francis Hodgson Burnett created by Rodgers and Hammerstein Lionel Bart and other leading lights of musical theater or conceived for a cast made up entirely of children The collection examines musicals that propagate or complicate normative attitudes regarding what childhood is or should be It also considers the child performer in movie musicals as well as in professional and amateur

Beletsky,Gordon H. Orians,1996 Drawing on detailed data from their sixteen year study of red winged blackbirds in the marshes of Washington s Columbia National Wildlife Refuge Beletsky and Orians analyze the information redwings use to make breeding season decisions and the consequences these decisions have for lifetime reproductive success Because male and female redwings make different

and often independent decisions males focus on territory acquisition and maintenance while females must choose when and where to nest and how much energy to invest in reproduction the authors have taken the novel approach of studying the sexes separately Using analyses of observational data combined with field experiments and game theoretical models the authors provide new insights into the complex patterns of reproductive decision making and breeding behavior in redwings This book will be of interest to all who study social animals including behavioral ecologists evolutionary biologists and ornithologists
