**The Routledge Handbook of Arabic Linguistics** Elabbas Benmamoun,Reem Bassiouney,2017-12-22 The Routledge Handbook of Arabic Linguistics introduces readers to the major facets of research on Arabic and of the linguistic situation in the Arabic speaking world The edited collection includes chapters from prominent experts on various fields of Arabic linguistics The contributors provide overviews of the state of the art in their field and specifically focus on ideas and issues Not simply an overview of the field this handbook explores subjects in great depth and from multiple perspectives In addition to the traditional areas of Arabic linguistics the handbook covers computational approaches to Arabic Arabic in the diaspora neurolinguistic approaches to Arabic and Arabic as a global language The Routledge Handbook of Arabic Linguistics is a much needed resource for researchers on Arabic and comparative linguistics syntax morphology computational linguistics psycholinguistics sociolinguistics and applied linguistics and also for undergraduate and graduate students studying Arabic or linguistics

**Syllable Weight** Matthew Gordon,2007-05-07 The book is the first systematic exploration of a series of phonological phenomena previously thought to be unified under the rubric of syllable weight Drawing on a typological survey of 400 languages it is shown that the traditional conception that languages are internally consistent in their weight criteria across weight based processes is not corroborated by the cross linguistic survey Rather than being consistent across phenomena within individual languages weight turns out to be sensitive to the particular processes involved such that different phenomena display different distributions in weight criteria The book goes on to explore the motivations behind the process specific nature of weight showing that phonetic factors explain much of the variation in weight criteria between phenomena and also the variation in criteria between languages for a single process The book is unlike other studies in combining an extensive typological survey with detailed phonetic analysis of many languages The finding that the widely studied phenomenon of syllable weight is not a unified phenomenon contrary to the established view is a significant result for the field of theoretical phonology The book is also an important contribution to the field of phonetically driven phonology since it establishes a close link between the phonology of weight and various quantitative phonetic parameters

**An Essay on Grammar-Parser Relations** J. van de Koot,2020-04-20 No detailed description available for An Essay on Grammar Parser Relations

**Routledge Handbook of Arabic Second Language Acquisition** Mohammad Alhawary,2018-05-04 The Routledge Handbook of Arabic Second Language Acquisition introduces major current approaches in Arabic second language acquisition SLA research and offers empirical findings on crucial aspects and issues to do with the learning of Arabic as a foreign language and Arabic SLA It brings together leading

academics in the field to synthesize existing research and develop a new framework for analyzing important topics within Arabic SLA. This handbook will be suitable as a reference work for advanced undergraduate and postgraduate students and scholars actively researching in this area and is primarily relevant to sister disciplines within teacher training and Arabic applied linguistics. The themes and findings should however also be attractive to other areas of study including theoretical linguistics, psycholinguistics, cognition and cognitive psychology.

**Introductory Grammar of Amharic** Wolf Leslau, 2000  
 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose. The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* 1936, but this grammar too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C. H. Dawkins 1960, yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

**A Contrastive Metrical Analysis of Main Word Stress in English and Cairene Colloquial Arabic** Mohamed Fathy Khalifa, 2017-06-20  
 This book analyses Cairene's interlingual errors in English main word stress following Halle and Vergnaud's 1987 metrical model and Archibald's 1998 parameter resetting. The findings show the difficulty the research subjects had in stressing items with stress different from Cairene Colloquial Arabic (CCA) and with stress similar to CCA. The book also shows that the subjects' correct stress patterns were due to parameter resetting and that English stress patterns that are both different and more marked than corresponding CCA stress patterns caused learning difficulties for the subjects.

**The Quarterly Index Islamicus**, 1989      **Modern Arabic** Clive Holes, 2004  
 The revised and updated edition of *Modern Arabic* takes this authoritative concise linguistic description of the structure and use of modern Arabic to an invaluable new level. Clive Holes traces the development of the Arabic language from Classical Arabic, the written language used in the 7th century for the Qur'an and poetry, through the increasingly symbiotic use of Modern Standard Arabic or MSA, the language of writing and formal speech, and dialectal Arabic, the language of normal conversation. He shows how Arabic has been shaped over the centuries by migration, urbanization and education, giving us a balanced, dispassionate and accurate picture of the structures, functions and varieties of the contemporary Arabic language. Holes explains the structural characteristics, phonology, morphology, syntax, semantics and lexical and stylistic developments that the majority of the dialects share as distinguished from Modern Standard Arabic. He also shows how native speakers use both types of Arabic for different purposes, with MSA being the language of power and control as used on television and in political

speeches and the dialects serving as the language of intimacy and domesticity He further shows how MSA and spoken dialects are not as compartmentalized as one might be led to believe Modern Arabic illustrates the use of the Arabic language in real life whether in conversation news bulletins and newspaper articles serious literature or song This new edition takes into account research published in several areas of Arabic linguistics since the first edition was published in 1995 It includes more extensive comment on the North African Arabic vocabulary of Modern Standard Arabic more information about mixed varieties of written Arabic that are not in MSA especially in Egypt updated references explanations and many new examples All Arabic is transcribed except for an appendix presenting the Arabic alphabet and script Students of the Arabic language will find Modern Arabic without peer as will those general linguists who are interested in discovering how Arabic compares structurally and sociolinguistically with European languages **Whitaker's Books in Print** ,1998

**Probus** ,1990 **Word Stress** Harry van der Hulst,2014-06-05 Word stress has long presented challenges to phonologists as they have sought to uncover patterns in its distribution and devise models to account for its behaviour and formal representation both within single languages and cross linguistically In this collection a team of world renowned researchers present a variety of viewpoints on the methods and problems involved Offering fresh perspectives on the topic and its study this book is specifically concerned with basing theoretical work on broad typological surveys and focuses on the collection selection and use of data in the analysis of word stress and word rhythm including their phonetic manifestations An extensive introduction presents a state of the art review of stress research The contributors also present StressTyp2 a project in an advanced stage of development which intends to make publicly available information on word stress in a broad sample of languages and will offer new ways of understanding this key research area **Meter in Poetry** Nigel Fabb,Morris

Halle,2008-08-21 Many of the great works of world literature are composed in metrical verse that is in lines which are measured and patterned Meter in Poetry A New Theory is the first book to present a single simple account of all known types of metrical verse which is illustrated with detailed analyses of poems in many languages including English Spanish Italian French classical Greek and Latin Sanskrit classical Arabic Chinese Vietnamese and Latvian This outstanding contribution to the study of meter is aimed both at students and scholars of literature and languages as well as anyone interested in knowing how metrical verse is made 1992, [الخطأ في النطق بالإنجليزية بين الناطقين بالعربية](#) **Errors in English Pronunciation among Arabic Speakers**

Mohamed Fathy Khalifa,2020-01-17 This book is a contrastive analysis of Arabs errors in English pronunciation regarding segmentals consonants consonant clusters and vowels and suprasegmentals main word stress It also explains the main interlingual reasons behind these errors and presents some teaching suggestions for surmounting them The findings show that the subjects substitute their own Arabic sounds for unfamiliar English ones producing incorrect English sounds In addition they apply Arabic main word stress rules instead of English ones producing incorrect English stress patterns The book also shows that English sounds and stress patterns that are both different and more marked than corresponding Arabic

ones caused learning difficulties for the subjects      Prosodic Studies Hongming Zhang, Youyong Qian, 2019-09-23 Prosody is one of the core components of language and speech indicating information about syntax turn taking in conversation types of utterances such as questions or statements as well as speakers attitudes and feelings This edited volume takes studies in prosody on Asian languages as well as examples from other languages It brings together the most recent research in the field and also charts the influence on such diverse fields as multimedia communication and SLA Intended for a wide audience of linguists that includes neighbouring disciplines such as computational sciences psycholinguists and specialists in language acquisition Prosodic Studies is also ideal for scholars and researchers working in intonation who want a complement of information on specifics      Majallat al-buhuth al-tarikhiyah ,1992      Issues in Phonological Structure S.J. Hannahs, Mike Davenport, 1999-12-15 This volume contains revised expanded and updated versions of papers originally presented at the International Workshop on Phonological Structure held at the University of Durham in September 1994 As the title suggests the contributions focus on aspects of phonological structure both segment internal and suprasegmental A number of questions surrounding phonological structure are approached from a wide variety of theoretical standpoints including the frameworks of prosodic phonology declarative phonology optimality theory metrical phonology government phonology feature geometry particle theory and dependency phonology This range of viewpoints allows the crossfertilisation of various strands of phonological thinking with respect to many of the central issues concerning phonological structure The empirical basis of the contributions is also wide ranging including among the languages dealt with Aranda Cayuvava English French Hungarian Italian Japanese Mandarin and Spanish
