Marxism and Real Estate Development Julian Roche,2023-09-01 This book straddles two worlds and attempts to bring them together that of Lefebvre s Marxism on the one hand and that of real estate development on the other Lefebvre has now become a household name amongst many contemporary Marxists especially those with an interest in urban planning and certain quarters of the architectural profession however his work is far less well known by real estate professionals whether investors developers brokers or indeed policymakers Marxism and Real Estate Taking Lefebvre Seriously has both a large scope and a very bold aim to use an explication and analysis of the work of Henri Lefebvre not only to present a critique of development but also to draw these two worlds together It therefore first aims to present the arguments of this increasingly well known French Marxist philosopher sociologist and pioneer of urban studies second to situate contemporary real estate development in the light of Lefebvre s work and third to analyse the potential application of Lefebvre s work to each of the major components of contemporary real estate to use Lefebvre s work in order to recommend practical action for developers working alongside planners and architects to influence the future of global real estate As well as its direction at developers themselves this book should be of interest to economists real estate researchers and professionals planners urban studies scholars and of course to those interested in the application of Lefebvre s work to real estate

Making Freedom Anne-Maria Makhulu,2015-10-23 In Making Freedom Anne Maria Makhulu explores practices of squatting and illegal settlement on the

outskirts of Cape Town during and immediately following the end of apartheid Apartheid's paradoxical policies of prohibiting migrant Africans who worked in Cape Town from living permanently within the city led some black families to seek safe haven on the city's perimeters Beginning in the 1970s families set up makeshift tents and shacks and built whole communities defying the state through what Makhulu calls a politics of presence In the simple act of building homes squatters who Makhulu characterizes as urban militants actively engaged in a politics of the right to the city that became vital in the broader struggles for liberation Despite apartheid's end in 1994 Cape Town's settlements have expanded as new forms of dispossession associated with South African neoliberalism perpetuate relations of spatial exclusion poverty and racism As Makhulu demonstrates the efforts of black Capetonians to establish claims to a place in the city not only decisively reshaped Cape Town's geography but changed the course of history
