Metropolitan Cities And Their Hinterlands In Early Modern Europe

Peter Clark

Metropolitan Cities And Their Hinterlands In Early Modern Europe:

Capital Cities and Their Hinterlands in Early Modern Europe Peter Clark, Bernard Lepetit, 1996 This work provides an analysis of European capital cities and their impact in the early modern period Capital cities were dynamic and influential accounting for more than a third of all European city growth during the 16th and 17th centuries Some were ancient cities like Paris and London a number were new expressions of royal power such as Madrid and Berlin other were colonial cities offshoots of state empires like Dublin or Naples *Metropolitan Cities and Their Hinterlands in Early Modern Europe* Erik Aerts, Peter Clark, 1990

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodox Judaism and Islam

Urban Achievement in Early Modern Europe Patrick O'Brien, 2001-04-12 Comparative urban history examines early modern economic and cultural achievements in Antwerp Amsterdam and London

Metropolis and Hinterland Neville Morley, 2002-12-19 Ancient Rome was one of the greatest cities of the pre industrial era Like other such great cities it has often been deemed parasitic a drain on the resources of the society that supported it Rome's huge population was maintained not by trade or manufacture but by the taxes and rents of the empire It was the archetypal consumer city However such a label does not do full justice to the impact of the city on its hinterland This book examines the historiography of the consumer city model and reappraises the relationship between Rome and Italy Drawing on archaeological work and comparative evidence the author shows how the growth of the city can be seen as the major influence on the development of the Italian economy in this period as its demands for food and migrants promoted changes in agriculture marketing systems and urbanisation throughout the peninsula

Amsterdam's Sephardic Merchants and the Atlantic Sugar Trade in the Seventeenth Century Yda Schreuder, 2018-10-23 This book surveys the role of Amsterdam's Sephardic merchants in the westward expansion of sugar production and trade in the seventeenth century Atlantic It offers an historical geographic perspective linking Amsterdam as an emerging staple market to a network of

merchants of the Portuguese Nation conducting trade from the Iberian Peninsula and Brazil Examining the Myth of the Dutch the Sephardic Moment and the impact of the British Navigation Acts Yda Schreuder focuses attention on Barbados and Jamaica and demonstrates how Amsterdam remained Europe's primary sugar refining center through most of the seventeenth century and how Sephardic merchants played a significant role in sustaining the sugar trade Spain, Europe, and the 'Spanish Miracle', 1700-1900 David R. Ringrose, 1998-11-26 A challenging re-examination of Spanish history questioning orthodoxies about Spain's economy and society

Port-Cities and their Hinterlands Robert Lee, Paul McNamara, 2022-03-14 This interdisciplinary book brings together eleven original contributions by scholars in the United Kingdom continental Europe America and Japan which represent innovative and important research on the relationship between cities and their hinterlands They discuss the factors which determined the changing nature of port hinterland relations in particular and highlight the ways in which port cities have interacted and intersected with their different hinterlands as a result of both in and out migration cultural exchange and the wider flow of goods services and information Historically maritime commerce was a powerful driving force behind urbanisation and by 1850 seaports accounted for a significant proportion of the world's great cities Ports acted as nodal points for the flow of population and the dissemination of goods and services but their role as growth poles also affected the economic transformation of both their hinterlands and forelands In fact most ports irrespective of their size had a series of overlapping hinterlands whose shifting importance reflected changes in trading relations political frameworks migration patterns family networks and cultural exchange Urban historians have been criticised for being concerned primarily with self-contained processes which operate within the boundaries of individual towns and cities and as a result the key relationships between cities and their hinterlands have often been neglected The chapters in this work focus primarily on the determinants of port hinterland linkages and analyse these as distinct but interrelated fields of interaction Marking a significant contribution to the literature in this field Port Cities and their Hinterlands provides essential reading for students and scholars of the history of economics

Town and Country in Europe, 1300-1800 S. R. Epstein, 2001 This 2001 book was the first survey of relations between town and country across Europe between 1300 and 1800

Urban Societies in East-Central Europe, 1500-1700 Jaroslav Miller, 2016-02-11 Whilst much has been written about early modern urban history the majority of this work has focussed on Western Europe with relatively little available in English on towns and cities in the former communist East However in recent years urban scholars have increasingly looked to a much more inclusive picture of Europe that compares and contrasts development across the whole continent Dealing primarily with Bohemia Hungary and the Polish Lithuanian Commonwealth this book provides an insight into a number of key issues concerning the economic social and demographic trends in early modern East Central European urban history Taking a supra-national perspective across a long time span it examines the effects of migration Reformation state building and economic change on the transformation of medieval urban communities into early modern

societies Drawing on a wealth of primary sources particularly the registers of new citizens kept by many towns and cities a fascinating picture of urban development and social structure is reconstructed that not only tells us much about East Central Europe but adds to our knowledge of the whole continent

Music and Musicians in Renaissance Cities and Towns

Fiona Kisby,2001-04-19 Examines musical culture in the towns and cities of Renaissance Europe and the New World *The Oxford Handbook of Cities in World History* Peter Clark,2013-02-14 In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns Becoming globally urban has been one of mankind's greatest collective achievements over time Written by leading scholar this is the first detailed survey of the world's cities and towns from ancient times to the present day

Voyages, Migration, and the Maritime World

Clara Ho,Ricardo Mak,Yue-him Tam,2018-09-10 This is a multi author volume resulted from an international conference focusing on topics related to our understanding of the role of China in the global history Apart from introductory chapters exploring methodological issues and providing big pictures of framing China in the world in particular time zones this volume also covers rich discussions on the following themes from the ancient period to the twentieth century organized water transport cultural interactions navigators port cities smuggling activities customs service foreign relations migration and diasporas Written by scholars of different generations who are based in diverse regions including Canada Hong Kong Japan Singapore Taiwan the UK and the US the chapters in this volume either address old questions from new perspectives or table new topics that were largely ignored in previous scholarship Some go further to brainstorm possible research directions in the future This thought provoking volume will be beneficial to readers who are interested in rethinking China's position in the global historical stage against the backdrop of Post Orientalism

Innovation and Creativity in Late Medieval and Early Modern European Cities

Karel Davids,Bert De Munck,2016-05-23 Late medieval and early modern cities are often depicted as cradles of artistic creativity and hotbeds of new material culture Cities in renaissance Italy and in seventeenth and eighteenth century northwestern Europe are the most obvious cases in point But how did this come about Why did cities rather than rural environments produce new artistic genres new products and new techniques How did pre industrial cities evolve into centres of innovation and creativity As the most urbanized regions of continental Europe in this period Italy and the Low Countries provide a rich source of case studies as the contributors to this volume demonstrate They set out to examine the relationship between institutional arrangements and regulatory mechanisms such as citizenship and guild rules and innovation and creativity in late medieval and early modern cities They analyze whether in what context and why regulation or deregulation influenced innovation and creativity and what the impact was of long term changes in the political and economic sphere

The Cambridge Urban History of

Britain Peter Clark,David Michael Palliser,Martin J. Daunton,2000-07-20 This volume examines when why and how Britain became the first modern urban nation

Material London, ca. 1600

Lena Cowen Orlin,2012-10-19 Between 1500 and 1700 London grew from a minor national capital to the largest city in Europe The defining period of growth was the period from

1550 to 1650 the midpoint of which coincided with the end of Elizabeth I's reign and the height of Shakespeare's theatrical career. In *Material London* ca. 1600, Lena Cowen Orlin and a distinguished group of social intellectual, urban architectural and agrarian historians, archaeologists, cultural anthropologists and literary critics explore the ideas, structures and practices that distinguished London before the Great Fire, basing their investigations on the material traces in artifacts, playtexts, documents, graphic arts and archaeological remains. In order to evoke material London ca. 1600, each scholar examines a different aspect of one of the great world cities at a critical moment in Western history. Several chapters give broad panoramic and authoritative views: what architectural forms characterized the built city around 1600; how the public theatre established its claim on the city; how London's citizens incorporated the new commercialism of their culture into their moral views. Other essays offer sharply focused studies: how Irish mantles were adopted as elite fashions in the hybrid culture of the court; how the city authorities clashed with the church hierarchy over the building of a small bookshop; how London figured in Ben Jonson's exploration of the role of the poet. Although all the authors situate the material world of early modern London in its objects, products, literatures, built environment and economic practices in its broader political and cultural contexts, provocative debates and exchanges remain both within and between the essays as to what constitutes material London ca. 1600.

The Early Modern European Economy Peter Musgrave, 1999-06-07. Until recently, study of the early modern economy in Europe has tended to have heroes and villains, the former being the progressive and modern economies of the Netherlands and England and the latter being doomed, backward and Catholic Italy and Spain. This picture has now changed quite drastically and there is far more emphasis on the general growth of the European economy during this period. The progressive removal of the neighbouring threats to European prosperity, particularly the gradual crippling of Ottoman power, created an environment which benefited all societies and not simply the traditionally emphasised Atlantic economies. [The Routledge Companion to Early Modern Europe, 1453-1763](#) Chris Cook, Philip Broadhead, 2012-10-02. This compact and highly accessible work of reference covers the broad sweep of events as Europe transformed during the period from the Renaissance to the Enlightenment. This Companion examines the centuries that saw the Reformation and Counter Reformation, the expansion of Europe and the beginnings of imperialism and enormous changes in the way government and kingship were conducted. With a wealth of chronologies, tables, family trees and maps, this handy book is an indispensable resource for all students and teachers of early modern history. [The Basic Environmental History](#) Mauro Agnoletti, Simone Neri Serneri, 2014-10-15. This book is an introductory instrument to the main themes of environmental history, illustrating its development over time, methodological implications, results achieved and those still under discussion. But the overriding aspiration is to show that the doubts, methods and knowledge elaborated by environmental history have a heuristic value that is far from negligible, precisely in its attitude to the most consolidated major historiography. For this reason, this book gives an overview of environmental history as it is an essential component of the basic knowledge of global history. At the same time, it

introduces specific aspects which are useful both for anyone wanting to deepen his her studies of environmental historiography and for those interested in one of the many disciplinary areas from rural history to urban history from the history of technology to the history of public health etc with which environmental history develops a dialogue **Urban Politics and the British Civil Wars** Laura Stewart, 2006-06-01 On 23 July 1637 riots broke out in Edinburgh These disturbances triggered the collapse of royal authority across the British Isles This volume explores the political and religious culture in the Scottish capital from the reign of James VI and I to the Cromwellian occupation It examines for the first time the importance of Edinburgh to the formation of the Scottish opposition movement and to the establishment of the revolutionary Covenanting regime Although the primary focus is the Scottish capital an explicitly British perspective is maintained This is a wide ranging study that engages in debates about early modern urban culture the problem of multiple monarchy and the issue of post Reformation religious radicalism
