Albert Rose

Metropolitan Winnipeg:

Metropolitan Problems S. Miles, 2013-05-13 *Metropolitan Problems* is the end product of one of the most dynamic research programmes of its kind ever conceived and executed. The book, which took three years to complete, represents the culmination of a two-year study that was highlighted by a conference held in Toronto in 1967. In the early 1960s, the Bureau of Municipal Research in Metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas. The study, with the official cooperation of the United Nations, was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis. Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts. Working with these experts were study groups drawn from forty major metropolitan centres throughout the world. After making exhaustive studies of their respective urban centres, the groups reported their findings and submitted detailed briefs through their representatives at the conference. Throughout the symposium, a conscious effort was made to examine single aspects of social, economic, and physical change within the overall perspective of the metropolis. The book reflects this approach. Each chapter directs attention to specific problems of the metropolis, problems resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change. Together, they prove that despite differences in technology, culture, and political and social matters, the major urban areas of the world do have much in common. Emerging tendencies can be analysed, and corrective and preventative measures can be made through comparative analysis. This book was first published in 1970. **GOVERNING METROPOLITAN INDIANAPOLIS** C. JAMES. WILLBERN OWEN (YORK.), 2021 *Governing Metropolitan Indianapolis* C. Advisory Commission on Intergovernmental Relations, 1974 *Governing Metropolitan Toronto* Albert Rose, 2023-11-10 *Governing Metropolitan Toronto: A Social and Political Analysis 1953-1971* provides an in-depth examination of Toronto's metropolitan governance, lauded as a model of truly metropolitan government in North America. Over nearly two decades, Toronto restructured its local government twice, adopting a two-tier federation model to address the challenges of urbanization, suburban expansion, and regional cooperation. This system, integrating multiple jurisdictions under a central framework, sought to resolve disparities in infrastructure, housing, and municipal services while accommodating the province's broader economic and environmental goals. Albert Rose, a scholar and civic participant, contextualizes Metro Toronto within Canadian and global urban governance traditions, offering insights into its achievements and the challenges posed by evolving social, environmental, and political dynamics. Rose argues that Toronto's experience demonstrates how metropolitan governance must grow from addressing physical infrastructure to managing complex social issues such as housing and environmental quality. While the provincial government provided oversight and enabled Metro's creation, its involvement underscores the role of higher-level authorities in urban governance.

The study situates Toronto's system alongside other Canadian and international models including Winnipeg's unitary approach and Minnesota's Metropolitan Council suggesting that Toronto's adaptable federation structure may be better suited for larger more complex urban regions Rose's work highlights the ongoing interplay between local autonomy and provincial guidance offering critical lessons for urban governance worldwide and serving as a valuable resource in understanding the transformative potential of metropolitan systems This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1972 Disaster Planning H. merging municipalities will improve local services and economic competitiveness has its roots deep in the nineteenth century. Municipalities in the US were first merged as early as 1848. However, despite being merged at the turn of the twentieth century, the city of New York was effectively bankrupt by 1975. In contrast, metropolitan Boston often seen as a recent success story in global competition comprises 282 distinct municipalities. Outside the United States, forced municipal mergers were a popular policy in many European countries and Canadian provinces during the 1960s and 1970s. The city of Laval just north of Montreal and the unicity of Winnipeg owe their origins to this period, but both amalgamations failed to meet their original objectives. Despite the emergence of public choice theory which justifies municipal fragmentation on market principles, some politicians and public servants in the 1990s have continued to advocate municipal amalgamations as a means of reducing public expenditure, particularly in Ontario. In *Merger Mania*, Andrew Sancton demonstrates that this approach has generally not saved money. He examines the history of amalgamation as well as studying recent forced municipal mergers in Halifax, Toronto, Ottawa, Hamilton, and Sudbury. In the concluding chapter, he examines the case for municipal amalgamation on the Island of Montreal and argues that those who would abolish locally elected municipal councils are obligated to explain very carefully, especially in light of evidence to the contrary, exactly why they think such drastic measures are necessary. A compelling examination of a timely issue, *Merger Mania* is a must read for anyone interested in the politics of city governments. Andrew Sancton is professor of political science at University of Western Ontario and the author of several books on city politics.

Planning Canadian Regions, Second Edition Gerald Hodge, Heather M. Hall, Ira M. Robinson, 2017-01-05. *Planning Canadian Regions* was the first book to integrate the history, contemporary practice, and emergent issues of regional planning in Canada. This much anticipated second edition brings the discussion up to date, applying the same thorough analysis to illuminate the rapid changes now shaping our regional landscapes. This new edition draws upon contemporary analyses, projects, and literature to address issues of spatial complexity now facing regional planners in Canada. Special attention is paid to the regional planning dimensions of climate change adaptation and environmental sustainability across Canada, the development inequities faced in peripheral resource regions, the role that Aboriginal peoples must play in the planning of their regions, and the distinctive planning needs of metropolitan regions across the country. This book challenges planners, educators, and policy makers to engage with the latest thinking and strive for best practices in twenty-first century regional planning.

Structural Changes in Local Government C. R. Tindal, 1977. **City Politics, Canada** James Lightbody, 2006-01-01. *City Politics, Canada* will both irritate and please, but it should be read; it raises all the important questions about urban governance in Canada. Caroline Andrew, Centre on Governance, University of Ottawa. **Governing Ourselves?** Mary Louise McAllister, 2011-11-01. Popular rhetoric suggests that the twenty-first century has ushered in an era of homogeneity. Urbanization, globalization, amalgamation, media conglomeration, and technological convergence have become familiar terms. Given the pressures of integration and assimilation, how are

people within communities able to make decisions about their own environment whether individually or collectively To what extent can they govern themselves Governing Ourselves explores issues of influence and power within local institutions and decision making processes using numerous illustrations from municipalities across Canada It shows how communities large and small from Toronto to Iqaluit have distinctive political cultures and therefore respond differently to changing global and domestic environments Case studies of Prince George Sherbrooke Saint John and Kitchener Waterloo are used to illuminate historical and contemporary challenges to local governance This stimulating book covers traditional topics such as government structures and institutions and intergovernmental relations It also reaches more broadly into areas of inquiry relevant to geography urban planning environmental studies public administration sociology and Canadian studies

A Modern Guide to Local and Regional Politics Copus, Colin, Kerley, Richard, Jones, Alistair, 2022-02-04 Utilising international material to explore the roles functions tasks responsibilities powers and actions of intra state politicians and the institutions to which they are elected this insightful book examines how local and regional authorities are pivotal in the democratic and governing arrangements of different countries
