Ikonen der Nationen Klaudija Sabo, 2017-09-25 Aufgrund eines Fehlers in der Herstellung enth lt die gedruckte Auflage Hinweise auf die falsche Creative Commons Lizenz CC BY NC ND statt CC BY daher wurde allen Exemplaren Erratazettel beigelegt In den Online Publikationen wurde dieser Fehler behoben Es gilt f r alle Ausgaben des Titels die CC BY Lizenz Nach dem Zusammenbruch Jugoslawiens stellte sich die brisante Frage wer die Stelle des einstigen

Helden Titos einnehmen und das von ihm hinterlassene visuelle Vakuum füllen würde. In Ikonen der Nationen analysiert Klaudija Sabo die künstlerischen Produktionen, die seit den 1980ern bis in die Gegenwart neue HeldInnenfiguren kreieren und damit nationale Identitätsbildungen in Kroatien und Serbien konstituieren. Um einen Stereotyp des Helden herauszufiltern, wurde eine Bandbreite an bewegten und statischen Quellen darunter Filme, Plakate, Postkarten, Comics, Karikaturen, Skulpturen sowie Malerei herangezogen und miteinander in Bezug gesetzt. Damit liefert die Arbeit sowohl einen Beitrag zur vergleichenden Geschichte der Nationsbildungsprozesse als auch zum Verständnis der gewaltvollen Konflikte in den 1990er Jahren.

The Idol in the Age of Art Rebecca Zorach, 2017-07-05. After 1500, as Catholic Europe fragmented into warring sects, evidence of a pagan past came newly into view, and travelers to distant places encountered deeply unfamiliar visual cultures. It became ever more pressing to distinguish between the sacred image and its opposite, the idol. Historians and philosophers have long attended to Reformation charges of idolatry, the premise for image breaking, but only very recently have scholars begun to consider the ways that the idol occasioned the making, no less than the destruction. The present book focuses on how idols and ideas about them matter for the history of early modern objects produced around the globe, especially those created in the context of an exchange or confrontation between an us and a them. Ranging widely within the early modern period, the volume contributes to the project of globalizing the study of European art, bringing the continent's commercial, colonial, antiquarian, and religious histories into dialogue. Its studies of crosses, statues, on columns, wax, ex votos, ivories, prints, maps, manuscripts, fountains, banners, and New World gold all frame Western art simultaneously as an idea and as a collection of real things, arguing that it was through the idol that object makers and writers came to terms with what it was, that art should be, and do.

Conceptualizing Cultural Hybridization Philipp Wolfgang Stockhammer, 2011-09-18. Within the context of globalization, cultural transformations are increasingly analyzed as hybridization processes. Hybridity itself, however, is often treated as a specifically post-colonial phenomenon. The contributors in this volume assume the historicity of transcultural flows and entanglements; they consider the resulting transformative powers to be a basic feature of cultural change. By juxtaposing different notions of hybridization and specific methodologies as they appear in the various disciplines, this volume's design is transdisciplinary. Each author presents a disciplinary concept of hybridization and shows how it operates in specific case studies. The aim is to generate a transdisciplinary perception of hybridity that paves the way for a wider application of this crucial concept.
