Mexican Americans And The Environment:

Mexican Americans and the Environment Devon G. Peña, 2022-09-13 Mexican Americans have traditionally had a strong land ethic believing that humans must respect la tierra because it is the source of la vida. As modern market forces exploit the earth, communities struggle to control their own ecological futures, and several studies have recorded that Mexican Americans are more impacted by environmental injustices than are other national origin groups. In our countryside, agricultural workers are poisoned by pesticides while farmers have lost ancestral lands to expropriation. And in our polluted inner cities, toxic wastes sicken children in their very playgrounds and homes. This book addresses the struggle for environmental justice, grassroots democracy, and a sustainable society from a variety of Mexican American perspectives. It draws on the ideas and experiences of people from all walks of life: activists, farmworkers, union organizers, land managers, educators, and many others who provide a clear overview of the most critical ecological issues facing Mexican origin people today. The text is organized to first provide a general introduction to ecology from both scientific and political perspectives. It then presents an environmental history for Mexican origin people on both sides of the border, showing that the ecologically sustainable Norteño land use practices were eroded by the conquest of El Norte by the United States. It finally offers a critique of the principal schools of American environmentalism and introduces the organizations and struggles of Mexican Americans in contemporary ecological politics. Devon Peña contrasts tenets of radical environmentalism with the ecological beliefs and grassroots struggles of Mexican origin people, then shows how contemporary environmental justice struggles in Mexican American communities have challenged dominant concepts of environmentalism. **Mexican Americans and the Environment** is a didactically sound text that introduces students to the conceptual vocabularies of ecology, culture, history, and politics, as it tells how competing ideas about nature have helped shape land use and environmental policies. By demonstrating that any consideration of environmental ethics is incomplete without taking into account the experiences of Mexican Americans, it clearly shows students that ecology is more than nature study but embraces social issues of critical importance to their own lives.

Environmental Justice in Ethnic American Literature Petr Kopecký, Jan Beneš, 2024-12-15 **Environmental Justice in Ethnic American Literature** focuses on a wide range of conceptions, depictions, and issues of environmental justice found in African American, Latinx, Asian American, and American Indian literature to provide a panorama of ethnic peoples, regions, and cultures affected by disproportionate exposure to environmental hazards and racial discrimination, now exacerbated by the effects of climate change. Specifically, the volume highlights the capacity of literature and literary criticism to help uncover the causes and consequences of instances of environmental injustice and their impact. The chapters analyze a diverse selection of voices and texts which underscore how the literary imagination of ethnic American writers captures in contrast with official statistics, impersonal data, and the reports compiled from them, the tangible and often inescapable problems of communities struggling against environmental racism. The issues addressed in the

volume range from slow violence transcorporeality food and reproductive justice to agrarianism while utilizing theoretical lenses such as ecofeminist paradigms or innovative applications of ecolinguistic methods to poetry Overall the monograph brings to the fore a diversity of literary responses to environmental racism and calls for environmental justice
