Climate Change and Human Security Michael R. Redclift, David Manuel Navarrete, Mark Pelling, 2011 The challenge presented by climate change is by its nature global The populations of the Mexican Caribbean the focus of this book are faced by everyday decisions not unlike those in the urban North The difference is that for the people of the Mexican Caribbean evidence of the effects of climate change including hurricanes is very familiar to them This important study documents the choices and risks of people who are powerless to change the economic development model which is itself forcing climate change The book examines the Mexican Caribbean coast and explores the wider issues of managing climate change in vulnerable areas of the tropics It also points to the inability to integrate development thinking into climate change adaptation The authors suggest that failures in local governance the transparency of state actions and the local populations lack of effective power represents a greater threat to adaptation than the absence of technical capacity in vulnerable areas Using local case studies of communities fishing villages and tourist destinations this well researched book will appeal to international students and academics working on climate change and professionals in development conservation and tourism industries

Ambrosie, 2015-09-10 Cruise ship passengers and all inclusive hotel guests are increasing exponentially as these floating and fixed properties proliferate in size and number This is especially true for developing economies that consider sun sand and sea tourism as a form of growth Tightly integrated multi billion dollar global enterprises mix with weak local institutions populated by local officials some corrupt vying for more investment to create a toxic cocktail with diminished social benefits as the hangover Within view of the shoreline and the towering monoliths of hotels and ships post secondary education facilities teach normative concepts of good management to students who upon graduation fight for a decreasing number of poorly paid jobs Meanwhile local government officials tout vacuous GDP figures and hospitality companies make inflated

claims of employment to garner federal funding for infrastructure expansion Many observers have made similar claims that have been easily ignored to date due to an absence of studies integrating tax revenue private and public finance and social outcomes This combination illustrates not only current structures but also how they are engendered Rather than relying on tourist satisfaction much investment is driven by windfall profits and tax loss carryforwards thanks to tax loopholes and willing local officials that ignore or aid in the violation of regulations While foreign companies condemn the corruption and cronyism at destinations local nationals decry the exploitative foreign companies The simple truth is that they flourish symbiotically As such this book necessarily addresses both actors However rather than being simply critical or numerical this book provides recommendations for multinational enterprises increasingly running the risk of detection of aggressive tax planning and greenwashing For host countries it provides recommendations of a virtuous cycle for improved public sector accountability to restore the beneficial effects of tourism There is also a discussion on how a value added study of the tourism industry within a jurisdiction could detect untaxed profits that are withheld through astute transfer pricing schemes This is a book for tourism managers and experts as well as policy makers in the Caribbean and any sun sand and sea destination that attracts floating and fixed all inclusives
