Mg 1911 To 1978:

MG, 1911 to 1978 Peter J. Filby, Peter Filby, 1979 **Early Medieval Monetary History** Martin Allen, 2016-12-05 Mark Blackburn was one of the leading scholars of the numismatics and monetary history of the British Isles and Scandinavia during the early medieval period. He published more than 200 books and articles on the subject and was instrumental in building bridges between numismatics and associated disciplines in fostering international communication and cooperation and in establishing initiatives to record new coin finds. This memorial volume of essays commemorates Mark Blackburn's considerable achievement and impact on the field, builds on his research, and evaluates a vibrant period in the study of early medieval monetary history. Containing a broad range of high quality research from both established figures and younger scholars, the essays in this volume maintain a tight focus on Europe in the early Middle Ages 6th-12th centuries, reflecting Mark's primary research interests. In geographical terms, the scope of the volume stretches from Spain to the Baltic, with a concentration of papers on the British Isles. As well as a fitting tribute to a remarkable scholar, the essays in this collection constitute a major body of research which will be of long term value to anyone with an interest in the history of early medieval Europe. **The Bookseller**, 1979 *Library of Congress Catalogs* Library of Congress, 1980 **The British Library General Catalogue of Printed Books 1976 to 1982** British Library, 1983 **Monographic Series** Library of Congress, 1979 National Union Catalog, 1979 Includes entries for maps and atlases **Warlike and Peaceful Societies** Agner Fog, 2017-10-13 Are humans violent or peaceful by nature? We are both. In this ambitious and wide-ranging book, Agner Fog presents a ground-breaking new argument that explains the existence of differently organised societies using evolutionary theory. It combines natural sciences and social sciences in a way that is rarely seen. According to a concept called regality theory, people show a preference for authoritarianism and strong leadership in times of war or collective danger but desire egalitarian political systems in times of peace and safety. These individual impulses shape the way societies develop and organise themselves, and in this book, Agner argues that there is an evolutionary mechanism behind this flexible psychology. Incorporating a wide range of ideas including evolutionary theory, game theory, and ecological theory, Agner analyses the conditions that make us either strident or docile. He tests this theory on data from contemporary and ancient societies and provides a detailed explanation of the applications of regality theory to issues of war and peace, the rise and fall of empires, the mass media, economic instability, ecological crisis, and much more. **Warlike and Peaceful Societies: The Interaction of Genes and Culture** draws on many different fields of both the social sciences and the natural sciences. It will be of interest to academics and students in these fields, including anthropology, political science, history, conflict and peace research, social psychology, and more, as well as the natural sciences including human biology, human evolution, and ecology. *Andrews County History* Promote Andrews, 2018-11-14 The entire story of Andrews County, Texas, from 1876 to 1978.
