aggression The focus of Chapters 8-12 is an examination of the mechanisms through which hormones might act to produce changes in agonistic responding Genetic developmental neural and biochemical influences are considered It is well known that environment social context and experience modulate the effects of hormones on behavior Thus Chapters 13-15 are designed to review the literature concerning hormone pheromone interactions hormonal responses to competition and the influence of social context on the endocrine system and aggressive behavior Frequently the principles advanced by behavioral endocrinologists are based on research in one species the rodent To provide a more comparative perspective and to examine specifically the generality of those principles generated for rodents Chapters 16-22 examine hormone aggression relationships in a variety of species including fish birds amphibians reptiles invertebrates primates humans ungulates and insects This volume should be useful to both beginning and advanced researchers in animal behavior behavioral endocrinology physiological psychology neuroendocrinology zoology physiology and psychiatry

The Dynamics of Aggression
Michael Potegal, John F. Knutson, 2013-06-17 Aggression usually involves a sequence of behaviors reflecting escalations and de-escalations in the form or intensity of the actions taken which play out over time This book provides a context in which social and biological research on the aggressive behaviors of human and non human subjects interacting in dyads or groups can be compared and integrated Implicit in this juxtaposition is the major question of whether general principles governing the dynamics of aggression within and between episodes may be discerned Aggressive behavior is described at different levels of analysis in humans and a number of other animal species Three basic views of aggression dynamics become apparent The economic interpretation Aggression will be escalated when it pays one of the combatants to do so or more generally when the potential benefits outweigh the risks Decisions to escalate or de-escalate are part of a calculated strategy in one or another sense This interpretation is formalized within game theoretic models as applied to animal conflicts and to international conflicts within the chapters of this text The psychological process interpretation Emphasis is placed on psychological physiological processes within the individual The chapters stress the importance of acute emotional states of anger and aggressive arousal and argue the role of peripheral sympathetic activation while proposing a central neural mechanism Children escalating their tantrums adult humans and animals of other species intensifying their interpersonal conflicts national leaders going to a war footing all appear to suffer a narrowing of attention and progressive failure of cognitive function under the intensifying stress of conflict Perhaps these changes in attention sensory and cognitive functions and risk taking reflect a commitment to aggression which is necessary for organisms to engage in potentially dangerous and painful encounters The emergent process interpretation Escalation emerges in a spontaneous and dynamic way as the actions of one participant elicit reactions from the other s

The Crisis of Our Time John Carvalho, 2014-07-15 Dr John Carvalho former Harvard academician and winner of the United States National Research Service Award is no stranger to the word crisis As a scientist scholar and statesman he has spent decades working on the front lines of biomedical and

theoretical exploration global health and the worldwide human rights movement The Crisis of Our Time is the astonishing partial memoir and discourse regarding his life's career and philosophy concerning the planet's most pressing problems Written in a way accessible to everyone Carvalho beginning with his passionate poetic and provocative first chapter challenges us to discover that the disastrous external crises of our lives emanate from the unity of our conscious and subconscious experiences Indeed the great troubles afflicting humanity war infectious disease economic recession terrorism family discord psychological trauma human rights violations dilemmas that appear unsolvable actually originate when without truthful self reflection we glorify mediocrity rather than strive to excel Employing cutting edge scientific information keen historical insight extensive cultural experience and profound philosophical analysis Carvalho dissects our crises to elucidate why they perpetuate In so doing he introduces his theory of causal circular systems to reveal how causes feed off and exacerbate effects which in turn reinforce those same causes Furthering his views he explores global health the example of excellence as well as economics political history planetary climate change and the most central crisis of all Being or Nothingness the fears of the Self the dread of our mortality Ultimately this short but eye opening book creates epic meaning while using an artistic literary style that is virtually unseen in nonfiction Anyone who genuinely seeks excellence over mediocrity truth over falsity meaning over purposelessness and resolution over despair should read Crisis
